Vernon Bailey Oct 14 2019 For the first time, this volume presents Vernon Bailey's correspondences and field notes spanning the majority of his life and career, collected and annotated by David J. Schmidly. Born in 1864 and raised on a Minnesota farm, Vernon Bailey became the first person to conduct extensive biological surveys of Texas, New Mexico, North Dakota, and Oregon. He was one of the founding members of the American Society of Mammalogists and pioneered the humane treatment of animals during fieldwork, developing and patenting traps designed to limit injuries or unnecessary stress. From an early age, Bailey developed an affinity for animals, observing their behaviors and eventually collecting specimens for closer study. He developed his own traps for catching mammals, birds, and reptiles and taught himself taxidermy from a book. When he was twenty-one, Bailey began sending samples of the animals he preserved to C. H. Merriam, the chief of the newly created Division of Economic Ornithology and Mammalogy of the USDA, later renamed the Bureau of Biological Survey and now the US Fish and Wildlife Service. Merriam was so impressed with Baily's work that he hired him, appointed him special field agent, and promptly sent him to the "inner frontiers" of the western and southwestern United States, despite the fact that Bailey had no formal training in biology. During his long career, Bailey kept detailed field notes, chronicling his travels and wildlife observations. These writings provide fascinating insight into not only people's relationships with and efforts to understand wildlife but also the ways the country was rapidly growing and changing at the beginning of the twentieth century.

Exegetical Dictionary of the New Testament, Vol. 1 Mar 31 2021 The English translation of the three-volume Exegetisches Wrterbuch zum Neuen Testament, this monumental work by an ecumenical group of scholars is first of all a complete English dictionary of New Testament Greek. Going beyond that, however EDNT also serves as a guide to the usage of every New Testament word in its various contexts, and it makes a significant contribution to New Testament exegesis and theology. EDNT's thorough, lengthy discussions of more significant words and its grouping of words related by root and meaning (with alphabetical cross-references) distinguish it from simpler Greek-English lexicons.

Pacific Payback Apr 19 2020 Describes the fearless crew of the USS Enterprise whose offensive blow in the Marshall Islands against the Japanese led the turning of the tide during World War II.

Volume I: U.S. Navy, U.S. Marine Corps and U.S. Coast Guard Aircraft Lost During World War II - Listed by Ship Attached Mar 19 2020 During World War II, the U.S. military lost some 35,000 aircraft to enemy action, training incidents, typhoons, aircraft carrier deck mishaps, mechanical failures or just normal wear-and-tear where aircraft were scrapped and used for parts to keep others flying. Many just failed to return from their missions. To date, the 15,069 aircraft represented in this 3-volume set is information initially transferred from hand-written "Aircraft History Cards" and are the total number of U.S. Navy, Marine Corps and Coast Guard aircraft lost between 7 December 1941 and 15 August 1945, and lost outside the continental United States (CONUS). Volume I represents the information on any aircraft lost that was attached to the 197 different ships in the database. Given the thousands of hours that went into this effort, the author hopes that, as a 3-volume set of reference books, it provides assistance to others who are researching ship, squadron and aircraft histories.
