science and technology and future of education and research are just some of the subjects discussed here. Procedural review is increasingly a means of deciding European fundamental rights cases; this book explores its practical potential and limitations. Ferris Bueller meets La Femme Nikita in this funny, action-packed young adult novel. Its prom night and Perry just wants to stick to his own plan and finally play a much anticipated gig with his band in the Big Apple. But when his mother makes him take Gobi Zaksauskas their quiet, geeky Lithuanian exchange student to the prom, he never expects that his ordinary high school guy life will soon turn on its head. Perry finds that Gobi is on a mission, and Perry has no other choice but to go along for a reckless ride through Manhattan's concrete grid with a trained assassin in Dad's red Jag. Infused with capers, car chases, heists, hits, henchmen, and even a bear fight, this story mixes romance, comedy, and tragedy in a true teen coming-of-age adventure and it's not over until its au revoir. This ebook includes a sample chapter of PERRY'S KILLER PLAYLIST. Write guidebooks, make travel TV, lead bus tours? Cameron Hewitt has been Rick Steves' right hand for more than 20 years, doing just that. The Temporary European is a collection of vivid, entertaining travel tales from across Europe. Cameron zips you into his backpack for engaging and inspiring experiences: sampling spleen sandwiches at a Palermo street market; hiking alone with the cows high in the Swiss Alps; simmering in Budapest's thermal baths; trekking across an English moor to a stone circle; hand-rolling pasta at a Tuscan agriturismo; shivering through Highland games in a soggy Scottish village; and much more. Along the way, Cameron introduces us to his favorite Europeans. In Mostar, Alma demonstrates how Bosnian coffee isn't just a drink, but a social ritual. In France, Mathilde explains that the true mastery of a fromager isn't making cheese, but aging it. In Spain, Fran proudly eats acorns, but never corn on the cob. While personal, the stories also tap into the universal joy of travel. Cameron's travel motto (inspired by a globetrotting auntie) is "Jams Are Fun"—the fondest memories arrive when your best-laid plans go sideways. And he encourages travelers to stow their phones and guidebooks, slow down, and

savor those magic moments that arrive between stops on a busy itinerary. The stories are packed with inspiration and insights for your next trip, including how to find the best gelato in Italy, how to select the best produce at a Provençal market, how to navigate Spain's confusing tapas scene, and how to survive the experience of driving in Sicily (hint: just go numb). And you'll get a reality check for every traveler's "dream job": researching and writing guidebooks; guiding busloads of Americans on tours around Europe; scouting and producing a travel TV show; and working with Rick Steves and his merry band of travelers. It's a candid account of how the sausage gets made in the travel business—told with warts-and-all honesty and a sense of humor. For Rick Steves fans, or anyone who loves Europe, *The Temporary European* is inspiring, insightful, and fun. Make sure you're studying with the most up-to-date prep materials! What accounts for the rise of the state, the creation of the first global system, and the dominance of the West? The conventional answer asserts that superior technology, tactics, and institutions forged by Darwinian military competition gave Europeans a decisive advantage in war over other civilizations from 1500 onward. In contrast, *Empires of the Weak* argues that Europeans actually had no general military superiority in the early modern era. J. C. Sharman shows instead that European expansion from the late fifteenth to the late eighteenth centuries is better explained by deference to strong Asian and African polities, disease in the Americas, and maritime supremacy earned by default because local land-oriented polities were largely indifferent to war and trade at sea. Europeans were overawed by the mighty Eastern empires of the day, which pioneered key military innovations and were the greatest early modern conquerors. Against the view that the Europeans won for all time, Sharman contends that the imperialism of the late nineteenth and early

*twentieth centuries was a relatively transient and anomalous development in world politics that concluded with Western losses in various insurgencies. If the twenty-first century is to be dominated by non-Western powers like China, this represents a return to the norm for the modern era. Bringing a revisionist perspective to the idea that Europe ruled the world due to military dominance, Empires of the Weak demonstrates that the rise of the West was an exception in the prevailing world order. A right to equality and non-discrimination is widely seen as fundamental in democratic legal systems. But failure to identify the human interest that equality aims to uphold reinforces the argument of those who attack it as morally empty or unsubstantiated and weakens its status as a fundamental human right. This book argues that an understanding of the human interest which equality aims to uphold is feasible within the jurisprudence of the European Court of Human Rights (ECtHR) and the European Court of Justice (ECJ). In comparing the evolution of the prohibition of discrimination in the case-law of both Courts, Charilaos Nikolaidis demonstrates that conceptual convergence within the European Convention on Human Rights (ECHR) and the EU on the issue of equality is not as far as it might appear initially. While the two bodies of equality law are extremely divergent as to the requirements they impose, their interpretation by the international judiciary might be properly analysed under a common light to emphasise the substantive dimension of equality in European Human Rights law. The book will be of great use and interest to scholars and students of human rights, discrimination law, and European politics. It is now commonplace to hear people say the EU is embroiled in an existential crisis. Indeed, Brexit may mean the process of EU disintegration has already begun. However, while much political and journalistic attention is centred on describing the EU's woes, far less attention is being paid to what the consequences of such a disintegration might be. From the terrorist and migration crises facing the Continent to the new threat from Russia, and from the euro's unending fragility to the rise of a new, Eurosceptic politics, Ian Kearns tells the story of the biggest crisis to hit Europe since the end of the Second World War. It*

*makes clear just what is at stake. With the EU in a far more fragile state than many realise, Collapse sets out the specific scenarios that could lead to the breakdown of the European Union. It charts the catastrophic economic, political and geopolitical developments likely to follow should such a collapse occur. And it offers bold solutions to challenge those in positions of authority to build a new, reformed union one capable of riding out the storm and of positioning Europe for success in the remainder of the twenty-first century. Drawing on the author's extensive network of senior political, diplomatic, military and business leaders from across the Continent, Collapse tells the story of Europe's super-crisis from within. Both an urgent warning and a passionate call to action, it seeks to defend not just the EU but the seven decades of peace and progress the union represents. The EU is one of the most notoriously complex international organisations. It is the only supranational organisation where nation-states agree to share sovereignty in some areas but not in others. At the heart of the EU debate across Europe are two opposing groups: one aims to devolve more sovereignty to the EU, with the aim of creating a European 'super-state' and the other wishes to devolve less, effectively relegating the EU to a mere discussion forum. In this accessible and engaging book, Mark Corner provides an essential introduction to the history and modern workings of the EU. Focusing on key themes in the union's development and the debates surrounding future enlargement, this book answers the key questions related to the EU and provides a 'one-stop shop' for anyone curious about future of Europe.*

*Why Noncompliance traces the history of noncompliance within the European Union (EU), focusing on which states continuously do or do not follow EU Law, why, and how that affects the governance in the EU and beyond. In exploring the EU's long and varied history of noncompliance, Tanja A. Börzel takes a close look at the diverse groups of noncompliant states throughout the EU's existence. Why do states that are vocally critical of the EU have a better record of compliance than those that support the EU? Why has noncompliance been declining since the 1990s, even though the EU was adding member-states and numerous laws? Börzel debunks*

*conventional wisdoms in EU compliance research, showing that noncompliance in the EU is not caused by the new Central and Eastern European member states, nor by the Eurosceptic member states. So why do these states take the brunt of Europe's misplaced ire? Why Noncompliance introduces politicization as an explanatory factor that has been long overlooked in the literature and scholarship surrounding the European Union. Börzel argues that political controversy combined with voting power and administrative capacity, explains why noncompliance with EU law has been declining since the completion of the Single Market, cannot be blamed on the EU's Central and Easter European member states, and is concentrated in areas where EU seeks to protect citizen rights. This book has both empirical and theoretical goals. The primary empirical goal is to examine the evolution of industrial relations in Western Europe from the end of the 1970s up to the present. Its purpose is to evaluate the extent to which liberalization has taken hold of European industrial relations and institutions through five detailed, chapter-length studies, each focusing on a different country and including quantitative analysis. The book offers a comprehensive description and analysis of what has happened to the institutions that regulate the labor market, as well as the relations between employers, unions, and states in Western Europe since the collapse of the long postwar boom. The primary theoretical goal of this book is to provide a critical examination of some of the central claims of comparative political economy, particularly those involving the role and resilience of national institutions in regulating and managing capitalist political economies. Bringing together Trudgill's columns for the New European, this collection explores the influence of European language on English. From the "master of historical narrative" (Financial Times), a dazzling, richly detailed, panoramic work—the first to document the genesis of a continent-wide European culture. The nineteenth century in Europe was a time of unprecedented artistic achievement. It was also the first age of*

*cultural globalization—an epoch when mass communications and high-speed rail travel brought Europe together, overcoming the barriers of nationalism and facilitating the development of a truly European canon of artistic, musical, and literary works. By 1900, the same books were being read across the continent, the same paintings reproduced, the same music played in homes and heard in concert halls, the same operas performed in all the major theatres. Drawing from a wealth of documents, letters, and other archival materials, acclaimed historian Orlando Figes examines the interplay of money and art that made this unification possible. At the center of the book is a poignant love triangle: the Russian writer Ivan Turgenev; the Spanish prima donna Pauline Viardot, with whom Turgenev had a long and intimate relationship; and her husband Louis Viardot, an art critic, theater manager, and republican activist. Together, Turgenev and the Viardots acted as a kind of European cultural exchange—they either knew or crossed paths with Delacroix, Berlioz, Chopin, Brahms, Liszt, the Schumanns, Hugo, Flaubert, Dickens, and Dostoyevsky, among many other towering figures. As Figes observes, nearly all of civilization's great advances have come during periods of heightened cosmopolitanism—when people, ideas, and artistic creations circulate freely between nations. Vivid and insightful, *The Europeans* shows how such cosmopolitan ferment shaped artistic traditions that came to dominate world culture. However, this inheritance of economic and social institutions that was the solution until around 1973--when Europe had to switch from growth based on brute-force investment and the acquisition of known technologies to growth based on increased efficiency and innovation--then became the problem. Sergio Fabbrini proposes a way out of the EU's crises, which have triggered an unprecedented cleavage between 'sovereignist' and 'Europeanist' forces. The intergovernmental governance of the multiple crises of the past decade has led to a division on the very rationale of Europe's integration project. Sovereignism (the expression of nationalistic and populist forces) has demanded more decision-making autonomy for the EU member states, although Europeanism has struggled to make an effective case against this challenge. Fabbrini proposes*

*a new perspective to release the EU from this predicament, involving the decoupling and reforming of the EU: on the one hand, the economic community of the single market (consisting of the current member states of the EU and of others interested in joining or re-joining it); and on the other, the political union (largely based on the eurozone reformed according to an original model of the federal union).*

Paul Hazard's magisterial, widely influential, and beloved intellectual history offers an unforgettable account of the birth of the modern European mind in all its dynamic, inquiring, and uncertain glory. Beginning his story in the latter half of the seventeenth century, while also looking back to the Renaissance and forward to the future, Hazard traces the process by which new developments in the sciences, arts, philosophy, and philology came to undermine the stable foundations of the classical world, with its commitment to tradition, stability, proportion, and settled usage. Hazard shows how travelers' tales and archaeological investigation widened European awareness and acceptance of cultural difference; how the radical rationalism of Spinoza and Richard Simon's new historical exegesis of the Bible called into question the revealed truths of religion; how the Huguenot Pierre Bayle's critical dictionary of ideas paved the way for Voltaire and the Enlightenment, even as the empiricism of Locke encouraged a new attention to sensory experience that led to Rousseau and romanticism. Hazard's range of knowledge is vast, and whether the subject is operas, excavations, or scientific experiments his brilliant style and powers of description bring to life the thinkers who thought up the modern world.
