In this major new work he presents a compelling and practical framework for how global citizens can use a holistic way forward to address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation, and political-economic injustice: sustainable development. Sachs offers readers, students, activists, environmentalists, and policy makers the tools, metrics, and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire, and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary-general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and clarion call for all who care about our planet and global justice. Conventional business wisdom tells us that entrepreneurs are society's main source of innovation. Young founders leave college with a big idea, get to work in a garage, and build something that changes the world. Typical corporate employees, strangled by slow-moving bureaucracy, are blocked from making transformative discoveries. In *Driving Innovation from Within*, strategist and advisor Kaihan Krippendorff disproves one of today's biggest business myths to highlight lessons for innovators and leaders. He reveals how many of the modern world's most impactful creations were invented by passionate employee innovators. If it were left up to go-it-alone entrepreneurs, we would not have mobile phones, personal computers, or e-mail. Distilling more than 150 interviews with internal innovators and leading experts along with insights from the latest research and today's most successful companies, from Tencent and Amazon to Mastercard and Starbucks, Krippendorff lays out a step-by-step playbook to unlock innovation from the inside. He maps the barriers that frustrate efforts to disrupt from within and provides tools to remove them, detailing how visionary leaders can create islands of freedom inside an organization to activate existing employees' potential and beat startups at their own game. *Driving Innovation from Within* is a practical and inspiring guide to leadership from all levels for those who want the fulfillment of changing the world without leaving their job in order to do it. How are disability and rehabilitation conceived of in different cultures? How can these concepts be made accessible? Studies from the fields of sociology, ethnology and educational science address these questions, while contributors from rehabilitation projects in development cooperation and from self-help movements highlight culturally different perceptions of disability. A distinctive feature of this volume is the dialogue it creates by bringing together scientific praxis and practical work. This book is a collection of virtually all the contributions presented and discussed at the symposium Local Concepts and Beliefs about Disability in Different Cultures. Here, people with disabilities from both North and South met with special education professionals, people working in development cooperation organizations and students and academics from different disciplines concerned with disability, and started a dialogue which is reflected in this volume. This dialogue, which was initiated at the symposium, should serve to continue in greater depth on the basis of this anthology. The reader has the further aim of carrying the dialogue beyond the restricted circle of symposium participants and making it accessible and comprehensible to a wider public. Disability in Different Cultures is an essential issue in development cooperation. On the one hand, disabilities, whether physical, mental or emotional, can be seen as parameters for the structural disadvantaging and deficits of the countries with so-called catching-up development. They are very frequently the results of hunger, malnutrition and wars. Thus NGOs are confronted with the issue of disability, regardless of the social and

economic areas with which they are concerned. Another reason for addressing the issue of Disability in Different Cultures is that it is wide-reaching, even if it is evident at first glance, and relates to the emancipatory potential of the topic. In exploring the wide variety of local concepts and different ideas and beliefs about disability, it becomes strikingly clear just how differently a disability may be judged. In this light, disability can no longer be perceived as a physical, psychological or mental characteristic that a person is born with or has acquired in the course of her or his life. It becomes evident that to a large degree attitudes and interaction with others, which are usual in the respective social context form and influences the nature and extent of a disability, thereby determines the life of the disabled person.

This text provides an introduction to this complex topic for students who are not outstandingly proficient in mathematics. It does this by providing the student with an analytical and an intuitive understanding of the classical linear regression model. Mathematical notation is kept simple and step-by-step verbal explanations of mathematical proofs are provided to facilitate a full understanding of the subject. The text also contains a large number of practical exercises for students to follow up and practice what they have learnt. Originally published in the USA, this new edition has been substantially updated and revised with the inclusion of new material on specification tests, binary choice models, tobit analysis, sample selection bias, nonstationary time series, and unit root tests and basic cointegration. The new

edition is also accompanied by a website with Powerpoint slideshows giving a parallel graphical treatment of topics treated in the book, cross-section and time series data sets, manuals for practical exercises, and lecture notes extending the text.
