The Handbooks in Finance are intended to be a definitive source for comprehensive and accessible information in the field of finance. Each individual volume in the series presents an accurate self-contained survey of a sub-field of finance, suitable for use by finance and economics professors and lecturers, professional researchers, graduate students and as a teaching supplement. It is fitting that the series Handbooks in Finance devotes a handbook to Asset and Liability Management. Volume 2 focuses on applications and case studies in asset and liability management. The growth in knowledge about practical asset and liability modeling has followed the popularity of these models in diverse business settings. This volume portrays ALM in practice, in contrast to Volume 1, which addresses the theories and methodologies behind these models. In original articles practitioners and scholars describe and analyze models used in banking, insurance, money management, individual investor financial planning, pension funds, and social security. They put the traditional purpose of ALM, to control interest rate and liquidity risks, into rich and broad-minded frameworks. Readers interested in other business settings will find their discussions of financial institutions both instructive and revealing. \* Focuses on pragmatic applications \* Relevant to a variety of risk-management industries \* Analyzes models used in most financial sectors Discover a concise, practical, and time-tested introduction to the most important areas of tax law with INCOME TAX FUNDAMENTALS 2017. Its popularity among society and the professional community is growing by leaps and bounds. What is it and what are its limits? What is the fundamental nature of cognitive therapy? It is, to my way of thinking, simple but profound. To understand it, it is useful to think back to the history of behavior therapy, to the basic development made by Joseph Wolpe. In the 1950s, Wolpe astounded the therapeutic world and infuriated his colleagues by finding a simple cure for phobias. The psychoanalytic establishment held that phobias-irrational and intense fear of certain objects, such as cats-were just surface manifestations of deeper, underlying disorders. The psychoanalysts said their source was the buried fear in male**

children of castration by the father in retaliation for the son's lust for his mother. For females, this fear is directed toward the opposite sex parent. The biomedical theorists, on the other hand, claimed that some as yet undiscovered disorder in brain chemistry must be the underlying problem. Both groups insisted that to treat only the patient's fear of cats would do no more good than it would to put rouge over measles. Wolpe, however, reasoned that irrational fear of something isn't just a symptom of a phobia; it is the whole phobia.

**FINANCIAL AND MANAGERIAL ACCOUNTING USING EXCEL FOR SUCCESS** leads students to accounting mastery while increasing Excel proficiency. Built with the modern business world in mind, this adaptation of the introductory textbook, **FINANCIAL AND MANAGERIAL ACCOUNTING, 11E** offers an innovative 4-step system for students to:

- (1) Read the accounting concept and illustration.
- (2) Follow the same concept using the Excel Success Example.
