Biography of Srinivas Ramanujan: Inspirational Biographies for Children Feb 25 2021 From childhood, Ramanujan was highly interested in mathematics. He could solve complex mathematical problems easily at a tender age of five to six years. At the age of five, he was sent to the village school to study. At school, he used to always discuss mathematics with his friends. He would ask such questions to his teachers, which were difficult to solve. He would ask about things like constellations and circumference from his teachers.

Biography of Dr Vikram Ambalal Sarabhai Jan 27 2021 Dr . Vikram Ambalal Sarabhai, the father of Indian space research programme, was amongst the greatest Indian scientists. The credit for India's crucial position and success in the field of space research goes to him. He inspired the Indian scientists not only to participate in research but also to work towards social development.

Vince Mar 17 2020 Published to widespread critical acclaim, Vince has been called: "the definitive biography" of an American legend. With stunning revelations and anecdotes, Vince Lombardi's life is pieced together with painstaking care in research, detail, and historical accuracy. Based on more than two hundred interviews, including those who played with him and against him, from his early coaching days at St. Cecilia High School in New Jersey to West Point, the New York Giants, and his championship seasons with the Green Bay Packers and

Washington Redskins. Drawing upon unpublished Lombardi family papers, Vince clarifies the thirty years of mystery and contradiction that have swirled around the legend of Vince Lombardi. Vince goes beyond the sidelines to reveal the true character of Lombardi. He was dedicated and narrow, intelligent and dogmatic, self-restrained yet emotional, abusive yet apologetic. His moods could swing from deep gloom to soaring exuberance in seconds. He was compassionate, kind, charitable. He could also be gripped by uncontrollable anger. Above all, Vince paints a portrait of a very human man who committed his life to winning.

Qualitative Research Interviewing Oct 24 2020 This text provides a comprehensive resource for those concerned with the practice of semi-structured interviewing, the most commonly used interview approach in social research, and in particular for depth, biographic narrative interviewing, the interview methods of choice in qualitative research.

Biographical Research Dec 18 2022 Studying people's lives requires acknowledging the multiple entanglements between individual singularity and processes of social patterning. This book testifies how challenging and creative the study of these connections can be. It gathers international contributions that show, in imaginative ways, how a person's life or specific domains of existence can be observed, tackled, and analysed across time. This volume reveals the potential of biographical research in the production of social theory, in the development of methodological innovation, in giving voice and protagonism to people, and in the understanding of the social unfolding of their lives. It is a testimony of a vibrant and youthful field, with a long tradition in social sciences, and with numerous connections with other study areas, namely the life course approach. The different chapters illustrate how the challenges posed by this type of

research focused on the individual level of analysis are particular and what creative responses are required to continue analysing the link between biography and society. The chapters in this book were originally published as a special issue of the journal Contemporary Social Science.

Biography and Social Exclusion in Europe Mar 29 2021 Throughout Europe, standardised approaches to social policy and practice are being radically questioned and modified. Beginning from the narrative detail of individual lives, this book re-thinks welfare predicaments, emphasising gender, generation, ethnic and class implications of economic and social deregulation.

Scientist Feb 14 2020 A masterful, timely, fully authorized biography of the great and hugely influential biologist and naturalist E. O. Wilson, one of the most ground-breaking and controversial scientists of our time—from the Pulitzer Prize-winning author of *The Making of the Atomic Bomb* “An impressive account of one of the 20th century’s most prominent biologists, for whom the natural world is ‘a sanctuary and a realm of boundless adventure; the fewer the people in it, the better.’” —The New York Times Book Review Few biologists in the long history of that science have been as productive, as ground-breaking and as controversial as the Alabama-born Edward Osborne Wilson. At 91 years of age he may be the most eminent American scientist in any field. Fascinated from an early age by the natural world in general and ants in particular, his field work on them and on all social insects has vastly expanded our knowledge of their many species and fascinating ways of being. This work led to his 1975 book *Sociobiology*, which created an intellectual firestorm from his contention that all animal behavior, including that of humans, is governed by the laws of evolution and genetics.

Subsequently Wilson has become a leading voice on the crucial importance to all life of biodiversity and has worked tirelessly to synthesize the fields of science and the humanities in a fruitful way. Richard Rhodes is himself a towering figure in the field of science writing and he has had complete and unfettered access to Wilson, his associates, and his papers in writing this book. The result is one of the most accomplished and anticipated and urgently needed scientific biographies in years.

Golem Girl Sep 03 2021 The vividly told, gloriously illustrated memoir of an artist born with disabilities who searches for freedom and connection in a society afraid of strange bodies “Golem Girl is luminous; a profound portrait of the artist as a young—and mature—woman; an unflinching social history of disability over the last six decades; and a hymn to life, love, family, and spirit.”—David Mitchell, author of *Cloud Atlas* WINNER OF THE BARBELLION PRIZE • FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD FOR AUTOBIOGRAPHY • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY KIRKUS REVIEWS What do we sacrifice in the pursuit of normalcy? And what becomes possible when we embrace monstrosity? Can we envision a world that sees impossible creatures? In 1958, amongst the children born with spina bifida is Riva Lehrer. At the time, most such children are not expected to survive. Her parents and doctors are determined to "fix" her, sending the message over and over again that she is broken. That she will never have a job, a romantic relationship, or an independent life. Enduring countless medical interventions, Riva tries her best to be a good girl and a good patient in the quest to be cured. Everything changes when, as an adult, Riva is invited to join a group of artists, writers, and performers who are building Disability Culture.

Their work is daring, edgy, funny, and dark—it rejects tropes that define disabled people as pathetic, frightening, or worthless. They insist that disability is an opportunity for creativity and resistance. Emboldened, Riva asks if she can paint their portraits—inventing an intimate and collaborative process that will transform the way she sees herself, others, and the world. Each portrait story begins to transform the myths she’s been told her whole life about her body, her sexuality, and other measures of normal. Written with the vivid, cinematic prose of a visual artist, and the love and playfulness that defines all of Riva's work, *Golem Girl* is an extraordinary story of tenacity and creativity. With the author's magnificent portraits featured throughout, this memoir invites us to stretch ourselves toward a world where bodies flow between all possible forms of what it is to be human. “Not your typical memoir about ‘what it’s like to be disabled in a non-disabled world’ . . . Lehrer tells her stories about becoming the monster she was always meant to be: glorious, defiant, unbound, and voracious. Read it!”—Alice Wong, founder and director, Disability Visibility Project

Molotov: A Biography Jun 19 2020 This is the first comprehensive biography of Molotov and reflects the range of sources that have become available to historians since the fall of the USSR. It is a commentary on Soviet history. Molotov played his part in revolution, Civil War, Lenin's Russia, Stalin's struggle with the oppositions, collectivization, industrialization, the Terror, the Great Patriotic War, the beginnings of the Cold War, and in the Khrushchev era.

Colin Powell Apr 10 2022 In this exploration of Colin Powell's career and character, Christopher D. O' Sullivan reveals several broad themes crucial to American foreign policy and yields insights into the evolution of American foreign and defense policy in the post-Vietnam, post-

Cold War eras. In addition, O'Sullivan explores the conflicts and debates between different foreign policy ideologies such as neo-conservatism and realism.

General George Washington Feb 20 2023 “The most comprehensive and authoritative study of Washington’s military career ever written.” –Joseph J. Ellis, author of *His Excellency: George Washington* Based largely on George Washington’s personal papers, this engrossing book paints a vivid, factual portrait of Washington the soldier. An expert in military history, Edward Lengel demonstrates that the “secret” to Washington’s excellence lay in his completeness, in how he united the military, political, and personal skills necessary to lead a nation in war and peace. Despite being an “imperfect commander”–and at times even a tactically suspect one–Washington nevertheless possessed the requisite combination of vision, integrity, talents, and good fortune to lead America to victory in its war for independence. At once informative and engaging, and filled with some eye-opening revelations about Washington, the American Revolution, and the very nature of military command, *General George Washington* is a book that reintroduces readers to a figure many think they already know. “The book’s balanced assessment of Washington is satisfying and thought-provoking. Lengel gives us a believable Washington . . . the most admired man of his generation by far.” –The Washington Post Book World “A compelling picture of a man who was ‘the archetypal American soldier’ . . . The sum of his parts was the greatness of Washington.” –The Boston Globe “[An] excellent book . . . fresh insights . . . If you have room on your bookshelf for only one book on the Revolution, this may be it.” –The Washington Times

Realist Biography and European Policy Jul 21 2020 *Realist Biography and European Policy* is

the first concerted attempt to integrate the separate strands of (critical) realism as a developed philosophy for social science with biographical narrative methods as a concrete methodological approach. The main goal is to demonstrate that the combination of critical realism and biographical methods is not only possible, but it is exceptionally well suited for the exploration of newly emerging research fields within European policy studies. This volume offers new insights to and is an indispensable reference for researchers in search of solid underpinnings for their own empirical research. Foreword by Miriam Kennet, Director of the Green Economics Institute, Founder and Editor of the International Journal of Green Economics. Contributors Tatiana Bajuk Sen?ar (Scientific Research Centre of the Slovenian Academy of Sciences and Arts, Institute of Slovenian Ethnology), Bob Carter (University of Leicester, Department of Sociology), Prue Chamberlayne (Open University, Faculty of Health and Social Care), Markieta Domecka (independent researcher), Norbert Kluge (coordinator and adviser for the European Works Council of ThyssenKrupp AG), Lyudmila Nurse (director of Oxford XXI), Elisabetta Perone (University of Naples Federico II), Valeria Pulignano (Centre for Sociological Research, KU Leuven), Antonella Spanò (University of Naples Federico II), Tom Wengraf (Middlesex University)

Sideways Stories From Wayside School Nov 17 2022 There has been a terrible mistake. Instead of having thirty classrooms side by side, Wayside School is thirty storeys high! (The builder said he was sorry.) Perhaps that's why all sorts of strange and unusual things keep happening – especially in Mrs Jewls's classroom on the very top floor. There's the terrifying Mrs Gorf, who gets an unusually fruity comeuppance; Terrible Todd, who always gets sent home

early; and Mauricia, who has a strange ice-cream addiction. Meanwhile, John can only read upside down, and Leslie is determined to sell her own toes. From top to bottom, Wayside is packed with quirky and hilarious characters who are all brought to life in this new edition with delightful illustrations by Aleksei Bitskoff throughout. This is an unmissable, irrepressible story of mixed-up mayhem from Louis Sachar, the bestselling author of Holes.

Biography of Meghnad Saha (MEGNATH) Dec 26 2020 Meghnad Saha was born in this family as the fifth child on October 6, 1893. His childhood was very ordinary. He had been a proud and determined person since childhood. Meghnad used to sit at the shop with his father. He would read books there in the shop whenever he got time

America's Constitution Apr 29 2021 In America's Constitution, one of this era's most accomplished constitutional law scholars, Akhil Reed Amar, gives the first comprehensive account of one of the world's great political texts. Incisive, entertaining, and occasionally controversial, this "biography" of America's framing document explains not only what the Constitution says but also why the Constitution says it. We all know this much: the Constitution is neither immutable nor perfect. Amar shows us how the story of this one relatively compact document reflects the story of America more generally. (For example, much of the Constitution, including the glorious-sounding "We the People," was lifted from existing American legal texts, including early state constitutions.) In short, the Constitution was as much a product of its environment as it was a product of its individual creators' inspired genius. Despite the Constitution's flaws, its role in guiding our republic has been nothing short of amazing. Skillfully placing the document in the context of late-eighteenth-century American politics, America's

Constitution explains, for instance, whether there is anything in the Constitution that is unamendable; the reason America adopted an electoral college; why a president must be at least thirty-five years old; and why—for now, at least—only those citizens who were born under the American flag can become president. From his unique perspective, Amar also gives us unconventional wisdom about the Constitution and its significance throughout the nation’s history. For one thing, we see that the Constitution has been far more democratic than is conventionally understood. Even though the document was drafted by white landholders, a remarkably large number of citizens (by the standards of 1787) were allowed to vote up or down on it, and the document’s later amendments eventually extended the vote to virtually all Americans. We also learn that the Founders’ Constitution was far more slavocratic than many would acknowledge: the “three fifths” clause gave the South extra political clout for every slave it owned or acquired. As a result, slaveholding Virginians held the presidency all but four of the Republic’s first thirty-six years, and proslavery forces eventually came to dominate much of the federal government prior to Lincoln’s election. Ambitious, even-handed, eminently accessible, and often surprising, America’s Constitution is an indispensable work, bound to become a standard reference for any student of history and all citizens of the United States.

The Biography of Sarah (Ewer) Blossom Davis Clarke Walley (1629, ENG-1692, Bristol, MA) [2nd, Updated Edition] Aug 22 2020 The purpose of this research paper is to provide a biographical summary for the author’s 8th great-grandmother, Sarah Ewer, and to reveal new information about her life which was recently discovered by the author. Sarah Ewer was a remarkable woman for several reasons: She persevered after her father died when she was only

nine years old; Sarah survived four husbands, all of “historical note”, two of whom suddenly died by drowning (along with a brother who was lost at sea); and she was a wonderful mother who raised seven children to adulthood even while mourning the tragic, accidental death of her two-year-old son. Between 1645 CE and 1692 CE, Sarah Ewer married four times: her first and last husbands were “Separatists” in Plymouth Colony; Sarah’s second spouse, the author’s ancestral grandfather, was the first “Quaker” in Barnstable, Plymouth Colony; and her third husband was among the first “Baptists” in Newport, RI. Sarah Ewer exhibited a great deal of “theological flexibility” within her lifetime, seemingly drawn to colonial men who chose to separate from the Church of England and, as a result, she had to endure Plymouth Colony governmental persecution while trying to nurture and to protect her children. When the author began researching his ancestral grandmother’s life 25 years ago, there existed three major “unsolved mysteries”: First, marriage records had not been found to prove that Sarah Ewer actually married her second husband, Nicholas Davis, in Barnstable, Plymouth Colony in 1651 CE. Second, information had not been discovered regarding Sarah’s whereabouts after the death of her third spouse, Dr. John Clarke, who died in 1676 CE Newport, RI. Third, genealogists, old and new, had been unable to confirm whether the Nicholas Davis who is listed as an “Inhabitant” of RI in 1638 was, in fact, Sarah Ewer’s future husband. This article presents evidence in an attempt to solve all three of these issues.

World Civilizations May 11 2022 For an accessible, comprehensive global survey of the world's major civilizations, Adler and Pouwels's **WORLD CIVILIZATIONS** offers a great balance between detail and brevity. This unique student-oriented text offers 53 short chapters

accompanied by strong pedagogy and critical thinking tools, giving instructors the flexibility to assign a wide range of major topics in world history in a variety of different ways, while making learning more manageable for students. The focused treatment of topics throughout history covers every major epoch and follows broad patterns and processes, while illuminating history through specific examples and a particular emphasis on social and cultural topics. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Auto/Biography and Auto/Ethnography Jan 07 2022 In a number of academic disciplines, auto/biography and auto/ethnography have become central means of critiquing of the ways in which research represents individuals and their cultures. Auto/biography and auto/ethnography are genres that blend ethnographic interests with life writing and they tell about a culture at the same time they tell about an individual life. This book presents educational researchers, in exemplary form, the possibilities and constraints of both auto/biography and auto/ethnography as methods of doing educational research. The contributors to this volume explore, by means of examples, auto/biography and auto/ethnography as means for critical analysis and as tool kit for the different stakeholders in education. The four thematic sections deal with: a. different possible uses and constraints of the two methods b. understanding teaching and teaching to learn c. institutional critiques d. experiences and trajectories as evidence of a sociology of everyday life. The book was written to be used by upper undergraduate and graduate students taking courses in research design; because of its practical approach, it is highly suitable for those contexts where research methods courses do not exist. The audience also includes professors, who want to have

a reference on design and methodology, and those who have not yet had the opportunity to employ a particular method.

Cod Nov 05 2021 Wars have been fought over it, revolutions have been spurred by it, national diets have been based on it, economies have depended on it, and the settlement of North America was driven by it. Cod, it turns out, is the reason Europeans set sail across the Atlantic, and it is the only reason they could. What did the Vikings eat in icy Greenland and on the five expeditions to America recorded in the Icelandic sagas? Cod -- frozen and dried in the frosty air, then broken into pieces and eaten like hardtack. What was the staple of the medieval diet? Cod again, sold salted by the Basques, an enigmatic people with a mysterious, unlimited supply of cod. Cod is a charming tour of history with all its economic forces laid bare and a fish story embellished with great gastronomic detail. It is also a tragic tale of environmental failure, of depleted fishing stocks where once the cod's numbers were legendary. In this deceptively whimsical biography of a fish, Mark Kurlansky brings a thousand years of human civilization into captivating focus.

The Palgrave Handbook of Auto/Biography Mar 09 2022 In a neo-liberal era concerned with discourses of responsible individualism and the 'selfie', there is an increased interest in personal lives and experiences. In contemporary life, the personal is understood to be political and these ideas cut across both the social sciences and humanities. This handbook is specifically concerned with auto/biography, which sits within the field of narrative, complementing biographical and life history research. Some of the contributors emphasise the place of narrative in the construction of auto/biography, whilst others disrupt the perceived boundaries between the individual and the social, the self and the other. The collection has nine sections: creativity and

collaboration; families and relationships; epistolary lives; geography; madness; prison lives; professional lives; 'race'; and social justice and disability. They illustrate the inter- and multi-disciplinary nature of auto/biography as a field. Each section features an introduction from a section editor, many of whom are established researchers and/or members of the British Sociological Association (BSA) Auto/Biography study group. The handbook provides the reader with cutting-edge research from authors at different stages in their careers, and will appeal to those with an interest in auto/biography, auto-ethnography, epistolary traditions, lived experiences, narrative analysis, the arts, education, politics, philosophy, history, personal life, reflexivity, research in practice and the sociology of the everyday. Chapter 1: A Case for Auto/Biography; Julie Parsons and Anne Chappell. Section One: Creativity and Collaboration; edited by Gayle Letherby. Chapter 2: The Times are a Changing: Culture(s) of Medicine; Theresa Compton. Chapter 3: Seventeen Minutes and Thirty-One Seconds: An Auto/Biographical Account of Collaboratively Witnessing and Representing an Untold Life Story; Kitrina Douglas and David Carless. Chapter 4: Reflections on a Collaborative, Creative 'Working' Relationship; Deborah Davidson and Gayle Letherby. Section Two: Families and Relationships: Auto/Biography and Family, A Natural Affinity?; edited by David Morgan. Chapter 5: Life Story and Narrative Approaches in the Study of Family Lives; Julia Brannen. Chapter 6: The Research Methods for Discovering Housing Inequalities in Socio-Biographical Studies; Elizaveta Polukhina. Chapter 7: Auto/Biographical Research and The Family; Aidan Seery and Karin Bacon. Section Three: Epistolary Lives: Fragments, Sensibility, Assemblages in Auto/Biographical Research; edited by Maria Tamboukou. Chapter 8: Letter-Writing and the

Actual Course of Things: Doing the Business, Helping the World Go Round; Liz Stanley. Chapter 9: The Unforeseeable Narrative: Epistolary Lives in Nineteenth Century Iceland; Erla Hulda Halldórsdóttir. Chapter 10: Auto/Pathographies In Situ: 'Dying of Melancholy' in Nineteenth Century Greece; Dimitra Vassiliadou. Section Four: Geography Matters: Spatiality and Auto/Biography; edited by John Barker and Emma Wainwright. Chapter 11: "Trying to Keep Up": Intersections of Identity, Space, Time and Rhythm in Women Student Carer Auto/Biographical Accounts; Fin Cullen, John Barker and Pam Alldred. Chapter 12: Spatiality and Auto/Biographical Narratives of Encounter in Social Housing; Emma Wainwright, Elodie Marandet and Ellen McHugh. Chapter 13: "I Thought... I Saw... I Heard...": The Ethical and Moral Tensions of Auto/Biographically Opportunistic Research in Public Spaces; Tracy Ann Hayes. Section Five: Madness, Dys-order and Autist/Biography: Auto/Biographical Challenges to Psychiatric Dominance; edited by Kay Inckle. Chapter 14: Autist/Biography; Alyssa Hillary. Chapter 15: Reaching Beyond Auto? A Polyvocal Representation of Recovery From "Eating Dys-order"; Bríd O'Farrell. Chapter 16: [R]evolving Towards Mad: Spinning Away from the Psy/Spy-Complex Through Auto/Biography; Phil Smith. Section Six: Prison Lives; edited by Dennis Smith. Chapter 17: Nelson Mandela: Courage and Conviction – The Making of a Leader; Dennis Smith. Chapter 18: The "Other" Prison of Antonio Gramsci and Giulia Schucht; Jeni Nicholson. Chapter 19: Bobby Sands: Prison and the Formation of a Leader; Denis O'Hearn. - Section Seven: Professional Lives; edited by Jenny Byrne. Chapter 20: Academic Lives in a Period of Transition in Higher Education: Bildung in Educational Auto/Biography; Irene Selway, Jenny Byrne and Anne Chappell. Chapter 21: Narratives of Early Career Teachers in a Changing

Professional Landscape; Glenn Stone. Chapter 22: What Does it Mean to be a Young Professional Graduate Working in the Private Sector?; Jenny Byrne. Section Eight: 'Race' and Cultural Difference; edited by Geraldine Brown. Chapter 23: Now You See Me, Now You Don't! Making Sense of the Black and Minority Ethnic (BME) Experience of UK Higher Education: One Person's Story; Gurnam Singh. Chapter 24: Raging Against the Dying of the Light; Paul Grant. Chapter 25: Black Young Men: Problematism, Humanisation and Effective Engagement; Carver Anderson. Section Nine: Social Justice and Disability: Voices From the Inside; by Chrissie Rogers. Chapter 26: Missing Data and Socio-Political Death: The Sociological Imagination Beyond the Crime; Chrissie Roger. Chapter 27: Co-Constructed Auto/Biographies in Dwarfism Mothering Research: Imagining Opportunities for Social Justice; Kelly-Mae Saville. Chapter 28: An Auto/Biographical Account of Managing Autism and a Hybrid Identity: 'Covering' for Eight Days Straight; Amy Simmons.

First Grade Fundamentals Oct 16 2022 First Grade Fundamentals will delight young learners with activities on consonants and vowels, vocabulary, addition and subtraction, fractions, phonics, reading comprehension, time and money, and more. Filled with colorful pages, easy-to-follow directions, and grade-appropriate activities, the Fundamentals series introduces and reinforces introductory concepts in math and language arts. --The series covers all of the basics for success in PreK to Grade 2 and is perfect for year-round learning. The fun, challenging activities will supplement what children are learning in school, reinforcing their understanding of the subject matter and enhancing school performance. Each page features directions that teach and guide children through key areas of learning.

Alexander Hamilton Jun 12 2022 Examines Hamilton's policies as secretary of the treasury.

Biography of CV Raman Nov 24 2020 A normal vision helps us to see the objects, but a scientific vision helps us $\frac{3}{4}$ imagine not only $\frac{3}{4}$ the absence of objects but also a solid shape of those $\frac{3}{4}$ invisible objects. It sharpens one's imagination. The credit for achieving $\frac{3}{4}$ the modern development in India, which is the basis of our nation's pride, $\frac{3}{4}$ goes to science and scientists. Dr . Chandrashekhra Venkat Raman is a highly $\frac{3}{4}$ respected name amongst the great Indian scientists. $\frac{3}{4}$

Information Problem-solving Dec 14 2019 The authors present an in-depth investigation of a powerful approach to integrated library and information skills instruction that defines the Big Six skills and discusses how to implement. Also included are instructional units and lessons.

Using Narrative in Research Jan 19 2023 *Using Narrative in Research* by Christine Bold provides an accessible, easy-to-understand guide to the theory and practice of the use of narrative in research. Written with those new to narrative in mind, this book will enable readers to understand the origins of narrative traditions and to plan and carry out a narrative study of their own. Christine Bold's book examines narrative approaches across a range of research contexts and disciplinary boundaries and will be of equal value to practitioners and academic students and researchers alike. Drawing on a range of real-life examples of narrative studies, *Using Narrative in Research* will enable readers to provide a sound justification for adopting a narrative-based approach and will help them to write about and write up narrative in research. This book examines:

- How we design research projects with a narrative approach
- Ethics
- Narrative thinking
- Collecting narrative data
- Analysing narrative data
- Representation in narrative

analysis • Reporting and writing up narrative research.

The Research Paper May 19 2020

Biography of Dr. Percy Lavon Julian (1899-2022): Greatest African-American Chemist of the 20th Century Oct 12 2019 For the best story (enactment) of the life of Dr. Percy Lavon

Julian, the greatest African-American chemist of the 20th century, google PBS NOVA

"Forgotten Genius" YouTube. The present book is a good bibliography and sourcebook, with 48 photographs and illustrations, many in color.

Bhimayana Nov 12 2019 Tegneserie - graphic novel. On the life and achievements of Bhimrao Ramji Ambedkar, 1891-1956, Indian statesman and social reformer

Henri Poincaré Jan 15 2020 A comprehensive look at the mathematics, physics, and philosophy of Henri Poincaré Henri Poincaré (1854–1912) was not just one of the most inventive, versatile, and productive mathematicians of all time—he was also a leading physicist who almost won a Nobel Prize for physics and a prominent philosopher of science whose fresh and surprising essays are still in print a century later. The first in-depth and comprehensive look at his many accomplishments, Henri Poincaré explores all the fields that Poincaré touched, the debates sparked by his original investigations, and how his discoveries still contribute to society today. Math historian Jeremy Gray shows that Poincaré's influence was wide-ranging and permanent. His novel interpretation of non-Euclidean geometry challenged contemporary ideas about space, stirred heated discussion, and led to flourishing research. His work in topology began the modern study of the subject, recently highlighted by the successful resolution of the famous Poincaré

conjecture. And Poincaré's reformulation of celestial mechanics and discovery of chaotic motion started the modern theory of dynamical systems. In physics, his insights on the Lorentz group preceded Einstein's, and he was the first to indicate that space and time might be fundamentally atomic. Poincaré the public intellectual did not shy away from scientific controversy, and he defended mathematics against the attacks of logicians such as Bertrand Russell, opposed the views of Catholic apologists, and served as an expert witness in probability for the notorious Dreyfus case that polarized France. Richly informed by letters and documents, Henri Poincaré demonstrates how one man's work revolutionized math, science, and the greater world.

How To Do Biography Sep 15 2022 It is not surprising that biography is one of the most popular literary genres of our day. What is remarkable is that there is no accessible guide for how to write one. Now, following his recent *Biography: A Brief History* (from Harvard), award-winning biographer and teacher Nigel Hamilton tackles the practicalities of doing biography in this first succinct primer to elucidate the tools of the biographer's craft. Hamilton invites the reader to join him on a fascinating journey through the art of biographical composition. Starting with personal motivation, he charts the making of a modern biography from the inside: from conception to fulfillment. He emphasizes the need to know one's audience, rehearses the excitement and perils of modern research, delves into the secrets of good and great biography, and guides the reader through the essential components of life narrative. With examples taken from the finest modern biographies, Hamilton shows how to portray the ages of man—birth, childhood, love, life's work, the evening of life, and death. In addition, he suggests effective ways to start and close a life story. He clarifies the difference between autobiography and

memoir and addresses the sometimes awkward ethical, legal, and personal consequences of truth-telling in modern life writing. He concludes with the publication and reception of biography's afterlife, so to speak. Written with humor, insight, and compassion, *How To Do Biography* is the manual that would-be biographers have long been awaiting.

Ageing and Biography Aug 02 2021 Personal life narratives can serve as a rich source of new insights into the experience of human aging. In this comprehensive volume, an international team of editors and contributors provide effective approaches to using biography to enhance our understanding of adult development. In addition to providing new theoretical aspects on aging and biography, the book also details new developments concerning the practical use of different biographical approaches in both research and clinical work. This is a landmark volume advancing the use of narrative approaches in gerontology.

Biography and Education Sep 22 2020 Over recent years biographical studies have gained an increasingly important place in academic study. The two are inextricably linked. Education uses biography in teaching, and in biography, education features strongly as a formative stage in personal development. This book elaborates on the analytical work that has drawn attention to biography and education, and seeks to expand the understanding of lives in educational contexts. Mainstream sociology has been quick to embrace this treatment of individuals as biographical appearances, but it is even more relevant in the field of education.

Writing an A+ Research Paper: A Roadmap for Beginning and Experienced Writers Apr 17 2020

Plunkitt of Tammany Hall Feb 08 2022 Narrated by a longtime New York City ward boss, this

volume reveals the successful application of corrupt practices such as patronage-based appointments and the exercise of power for personal gain.

Coming to Narrative May 31 2021 Reflecting on a 50 year university career, Distinguished Professor Arthur Bochner, former President of the National Communication Association, discloses a lived history, both academic and personal, that has paralleled many of the paradigm shifts in the human sciences inspired by the turn toward narrative. He shows how the human sciences—especially in his own areas of interpersonal, family, and communication theory—have evolved from sciences directed toward prediction and control to interpretive ones focused on the search for meaning through qualitative, narrative, and ethnographic modes of inquiry. He outlines the theoretical contributions of such luminaries as Bateson, Laing, Goffman, Henry, Gergen, and Richardson in this transformation. Using diverse forms of narration, Bochner seamlessly layers theory and story, interweaving his professional and personal life with the social and historical contexts in which they developed.

Pamphlets on Biography (Kofoid Collection) Aug 14 2022

Writing Educational Biography Oct 04 2021 First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

Muhammad Ali Jul 01 2021 Describes the life of the heavyweight fighter, both in and out of the ring.

Writing Biography Dec 06 2021 The historian as biographer must resolve questions that reflect the dual challenge of telling history and telling lives: How does the biographer sort out the individual's role within the larger historical context? How do biographical studies relate to other

forms of history? Should historians use different approaches to biography, depending on the cultures of their subjects? What are the appropriate primary sources and techniques that scholars should use in writing biographies in their respective fields? In *Writing Biography*, six prominent historians address these issues and reflect on their varied experiences and divergent perspectives as biographers. Shirley A. Leckie examines the psychological and personal connections between biographer and subject; R. Keith Schoppa considers the pervasive effect of culture on the recognition of individuality and the presentation of a life; Retha M. Warnicke explores past context and modern cultural biases in writing the biographies of Tudor women; John Milton Cooper Jr. discusses the challenges of writing modern biographies and the interplay of the biographer's own experiences; Nell Irvin Painter looks at the process of reconstructing a life when written documents are scant; and Robert J. Richards investigates the intimate relationship between life experiences and new ideas. Despite their broad range of perspectives, all six scholars agree on two central points: biography and historical analysis are inextricably linked, and biographical studies offer an important tool for analyzing historical questions.
