This paper focuses on the fact that the 2004–2005 conditionality review expands to include a review of the application of the new Guidelines on Conditionality, adopted in 2002. These guidelines were the culmination of a comprehensive and far-reaching review of conditionality that aimed to enhance the effectiveness of IMF-supported programs. They represented the first revision of the IMF’s conditionality guidelines since 1979, and were developed by the IMF after seeking input from civil society and public forums held in several countries. This review comes at an early stage of experience with the new guidelines, and further evidence will be needed before definite conclusions can be drawn. The ultimate test of conditionality is whether it contributes to better economic outcomes, including over the medium term, and these cannot yet be gauged. Moreover, although this review draws in part on case**

studies, no substitute exists for cross-country analysis for identifying broad trends, and at this stage such analysis is hampered by small sample sizes. This workbook was designed based on the guidelines outlined in the amended CXC CSEC English syllabus effective for the May - June 2018 examinations. It was developed in response to requests of teachers and students to have resources, validated by CXC, to assist them in completing the SBA. The activities in this Workbook will allow the teachers to more efficiently and effectively integrate the SBA in every day classroom activities. At the end of each group meeting, there is a Group Meeting Participation Form for students to complete. This form allows the teacher to monitor what happens outside the classroom as well. It also allows the students to have evidence to support their declarations in discussing their individual participation and group participation. The Workbook also incorporates activities which will help students to successfully complete the required tasks. The activities scaffold the thinking that will be required to complete the final tasks. The step by step approach makes the overall process easier. Finally, the Workbook contains sample SBAs. One is used as a working example to show how each task is supposed to be completed. The working sample also includes guidelines for completion. The other sample at the end of the Workbook was included to give students a clearer idea of how their final portfolio should be compiled. It was also included to show how students can work within the same theme/issue/topic/event and write the same written report but have different individual pieces. The SBA component provides a unique opportunity for students to improve their competence and achievement in English. It is my hope that School Based Assessment in English: A guide and workbook for students will make that opportunity more a reality.
