Samantha Michaels has spent years helping people overcome health challenges, lose weight and reach ideal health goals while enjoying good and healthy food. She is an author of numerous health books and provide amazing yet very healthy recipes everyone can enjoy. She loves food and spends most of her time helping people address diet challenges by teaching them to cook the right meals. Her diet programs have helped a lot of people lose weight in a smart, practical way and she lives what she preaches that you do not have to get hungry while on a diet. What is the single most important thing you can do for your health? Avoiding "sugary" food is a great start to a healthier you. But some foods (like French fries, breads, and cereals) quickly convert to sugar during digestion. Knowing the glycemic values of the foods you eat puts you right on the cutting edge of your own healthcare. Glycemic values [Glycemic index (GI) and Glycemic load (GL)] show us how our bodies respond to different foods. This response is at the heart of an endless list of diseases -- and can guide us on a new path to optimum health. The World Health Organization endorses using glycemic values in selecting foods, but many health professionals consider GI and GL too complicated to use in their clinical practice....It is easier to prescribe a pill for each symptom than to teach patients how to use this life-changing information. This translates into not listing GI and GL values on our packaged food products and not including these important values in our national nutrient database files. So it is up to the consumer to figure it out on their own. In this groundbreaking guide, the first of its kind, Ms. Lickus brings you these key glycemic values just for foods born in the USA. As you read this book, you'll find detailed guidelines with clear, easy-to-understand examples that show you how you can use glycemic values to power your health to a new all-time-high, at any age. The benefits can be amazing - not only in treating or preventing serious illness, but in increasing your energy, losing extra weight for good, feeling simply awesome for life, and so much more. CHEAT SHEET SIMPLY for USA FOODS provides a revolutionary layout of nutrition information for USA foods. This powerful, time-saving reference puts the glycemic values you need all in one place -- right at your fingertips. Here's how it works: Five charts display over three hundred seventy five foods. Each chart is twenty eight pages long. Each chart organizes foods based on a specific feature of their effect on metabolism. The unprecedented way these charts are organized is vital to your health because the USA foods that are healthiest for you are at the top of the first four charts! Building your meals around these foods will leave you feeling satisfied and simply amazed at how easy it is to reach your health and fitness goals. You'll learn which USA foods have the least amount of carbs, the lowest glycemic index, the most fiber, and the lowest glycemic load. Glycemic load is important because it gives you guidance on how much of that food you can eat. But that's not all. The fifth chart lists foods alphabetically and into basic food groups. This section makes it easy for you to compare and understand the way different preparation methods affect how your body processes carbohydrates...leading to better health. Why wait half a century or even a couple of decades for glycemic values to finally make their way into the mainstream? You can build a healthier body and mind on the leading edge of this empowering new information starting right now! Do you need a quick reference for Excel for Microsoft 365? The four-panel Excel for Microsoft 365 Reference & Cheat Sheet contains tips, examples, and screenshots of basic Excel functions and features. Patrick Thibeault has served in the US Army in various capacities since the 1990s, originally training as a Airborne soldier before specialising as a combat medic. My Journey as a Combat Medic covers his original training and deployment before providing a look at the roles he's since played in the US Army's forces, including his recent deployment to Afghanistan. It is a no-holds bar look at the modern medic in the US Army, allowing us a glimpse at the training as a soldier and as a specialist, as well as deployment and front line duties and the impact of service on civilian life, including an honest look at PTSD, from the author's own personal experience. Rather than a technical manual, My Journey as a Combat Medic is a detailed first hand account, concluding with a letter to new medics, providing a career's worth of advice and knowledge as they begin their journeys. These questions and more are answered in this research based investigation into the nature and circumstances of Academic Cheating. Cheating has always been a problem in academic settings, and with advances in technology (camera cell phones, the internet) and more pressure than ever for students to test well and get into top rated schools, cheating has become epidemic. At the same time, it has been argued, the moral fiber of society as a whole has dampened to find cheating less villainous than it was once regarded. Who cheats? Why do they cheat? and Under what circumstances? Psychology of Academic Cheating looks at personality variables of those likely to cheat, but also the circumstances that make one more likely than not to try cheating. Research on the motivational aspects of cheating, and what research has shown to prevent cheating is discussed across different student populations, ages and settings. Summarizes 50 years of academic cheating trends in K-12 and postsecondary institutions Examines the methodology of academic cheating including the effect of new technologies Reviews and discusses existing theories and research about the motivation behind academic cheating The Reference Manual for Humanitarian Health Professionals: Missioncraft in Disaster Relief is a hands-on resource written for disaster relief practitioners, educators, and researchers working in clinical medicine, public health, or disaster management.
