Unlike traditional music, film music sources are often difficult to locate and do not follow the patterns that researchers are trained to identify. Although there have been several self-described introductions to the field and articles that summarize the problems and state of research, there is no resource that gathers together all of the basic information that is vital to film music research. In this volume, Jeannie Gayle Pool and H. Stephen Wright address the difficulties scholars encounter when

conducting research on film and television music. Intended as a guide for scholars and researchers in navigating the complex world of film and television music, this book provides a detailed taxonomy of film music primary sources and explains how to find and interpret them. The authors tackle the problems of determining film score authorship and working with recordings of film music. A bibliographic essay summarizes the major works and trends in film music research and provides clear pointers to the most important resources in the field. An up-to-date guide to important collections of film music sources and other research materials is also included. Designed to clarify the nature of film music source materials and how they are generated, *A Research Guide to Film and Television Music in the United States* provides clear signposts for scholars and identifies opportunities for further research.

To understand how government ought to work, you first have

to know the framework and principles of the people who designed and structured it. Then, you must also be aware of your responsibilities as a citizen within it. The U.S. Constitution impacts your life and future in ways you probably never imagined. Now delve into the history and everyday applications of the Constitution as you learn how: The three branches of government are meant to interact - and what happens throughout history when checks and balances have been ignored or circumvented[,] You and other citizens can carefully vet candidates that adhere to the Constitution as it was written[,] To work to support legislation that works within constitutional boundaries and not special political party interests[.] The U.S. Constitution remains one of the most amazing safeguards of liberty ever written, but it only works if "we the people" know not just our rights, but the way the government is designed to work - not for the benefit of an all-powerful federal government or per the whims of a judge or political party - but the actual protections at every level that are designed to keep power in the hands of the population for which it must serve." - amazon.com, 7/16/20. and Jerry Hicks will change readers' lives by teaching them how to align themselves with the Source that exists within all of us. Living a better-feeling life really comes down to one thing only: coming into alignment with the Energy of our Source. Abraham reminds us that we are truly Source Energy focused on our physical bodies and that a conscious Connection to that Broader Non-Physical part of us is necessary if we are to be the joyful Beings that we were born to be. Abraham calls that wonderful alignment Getting into the Vortex. Through a series of Leading Edge books (New York Times bestsellers), Abraham has emphasized the importance of our conscious alignment with the Source within us. They have let us know that our natural state of Being is inside our Vortex of Creation in complete alignment with Source Energy- and that every aspect of our physical experience reflects our alignment with or resistance to, that Connection. Everything-from the physical well-being of our bodies, the clarity of our minds, and the abundance we allow to flow, to the satisfaction in every relationship we experience-is impacted by our all-important relationship with our Vortex. Abraham has helped us to understand that our dominant intent in every day is to get into the Vortex! And now, they have lovingly and specifically guided Jerry and Esther Hicks in the creation of an innovative and valuable tool that promises to get us into the Vortex right now . . . and that tool is included with the

It is extremely dangerous to accept the “great” thinkers and writers uncritically, whether it be Karl Marx, Ralph Waldo Emerson, or Nathaniel Hawthorne. The great thinkers and the liberal arts programs have influenced millions of young people to abandon the Christian faith over the centuries. Every Christian student should be familiar with the ideas and the writings that have formed the modern world and that subsequently undermined the Christian foundations in the West. Young people must also be well-versed and well-equipped to engage in the battle of worldviews before they graduate from high school or college. That is why this curriculum is so desperately needed. It includes: Selected readings and summaries of 15+ philosophers and authors, with in-depth analysis of influential literary works Reviews of popular music and movies Prayers to equip students in the war of ideas. This course presents a basic survey and a critical analysis of the philosophers,

the literary masters, and the cultural influencers of the last 300 years for the Christian student. In contrast with other literature courses, this text is filled with relevant biblical references and truths that will equip the student to address the false worldviews contained in the “great” humanist works of this era.
