Community & Public Health Nursing Mar 03 2021 Ensuring students meet the competencies outlined in the Quad Council of Public Health Nursing Organizations (ACHNE, 2011) and AACN's (2008) publication *Essentials of Baccalaureate Education for Professional Nursing Practice* Community and Public Health Nursing, the 3rd Edition of Community & Public Health is a primer to community, public, and population health nursing that develops students' abstract critical thinking skills and complex reasoning abilities through case studies, exercises, and examples throughout the highly illustrated text. Authors DeMarco & Healey-Walsh introduce public health concepts from an evidence-based perspective, allowing students to make connections between data and practice decisions. Because evidence-based practice guides quality performance improvements, the authors teach students to gather, assess, analyze, apply, and evaluate evidence— derived from epidemiology and other sources— for making public health practice decisions and for planning the care of individuals, families, and groups in the community. Examples assist students in interpreting and applying statistical data. The authors integrate timely topics (major challenges to nursing practice in the community, community and public health nursing specialties, cultural diversity, health disparities, globalism, epidemiology and basic biostatistics, and ethical considerations, Preventative immunizations, political proactiveness, advanced practice preparation, sustainable health goals, ebola, telehealth, opioid epidemic, veterans and LBGQ as a underserved populations, iPrepare, health literacy, health promotion conferences, and Healthy People 2020.) Special attention will be given to add additional features and ancillaries that allow students to actively learn. Healthy People 2020, and students will complete short active learning activities/questions will allow students apply the goals to real-life scenarios. NEW to this edition's ancillary package are unfolding case studies related to our new clinical replacement solution Lippincott Clinical Experiences: Community, Public, and Population Health. Our PowerPoints have been enhanced and are now heavily illustrated.

The Future of Nursing Nov 30 2020 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Nutrition Essentials for Nursing Practice Feb 26 2023 The Seventh Edition of this nursing-focused nutrition text has been updated to reflect the latest evidence-based practice and nutrition recommendations.
