Airfields Of 8th Feb 14 2022 A unique, nostalgic look at the airfields used by the Eighth in the United Kingdom during the Second World War. Conceived in war, the airfields experienced their moments of glory and, when the war ended,

were left empty and derelict to die. The few which remain virtually intact have only survived because some private or public concern has formed a practical use for them, although not always as airfields. Some of the more remote airfields still dot the countryside the same as when the last plane left their runways and the last truck departed through the main gate. They are bleak, windswept and moldering but they retain the atmosphere of the fine, high endeavors of the people who inhabited them and the aura of ineffable sadness that hangs over memorials to fighting men. For such they are.

The 8th Habit Oct 10 2021 In the 7 Habits series, international bestselling author Stephen R. Covey showed us how to become as effective as it is possible to be. In his long-awaited new book, *THE 8th HABIT*, he opens up an entirely new dimension of human potential, and shows us how to achieve greatness in any position and any venue. All of us, Covey says, have within us the means for greatness. To tap into it is a matter of finding the right balance of four human attributes: talent, need, conscience and passion. At the nexus of these four attributes is what Covey calls voice - the unique, personal significance we each possess. Covey exhorts us all to move beyond effectiveness into the realm of greatness - and he shows us how to do so, by engaging our strengths and locating our powerful, individual voices. Why do we need this new habit? Because we have entered a new era in human history. The world is a profoundly different place than when *THE 7 HABITS OF HIGHLY EFFECTIVE PEOPLE* was originally published in 1989. The challenges and complexity we face today are of a different order of magnitude. We enjoy far greater autonomy in all areas of our lives, and along with this freedom comes the expectation that we will manage ourselves, instead of being managed by others. At the same time, we struggle to feel engaged, fulfilled and passionate. Tapping into the higher reaches of human genius and motivation to find our voice requires a new mindset, a new skill-set, a new tool-set - in short, a whole new habit.

Work Want Work Feb 02 2021 Work Want Work considers in captivating detail how a logic of work has become integral

to everything we do, even as the place of formal work has become increasingly precarious. With reference to sociological data, philosophy, political theory, legislation, the testimonies of workers and an eclectic mix of cultural texts - from Lucian Freud to Google, Anthony Giddens to selfies, Jean-Luc Nancy to Amy Winehouse - Pfannebecker and Smith lay out how the capitalism of globalized technologies has put our time, our subjectivities, our experiences and our desires to work in unprecedented ways. As every part of life is colonized by work without securing our livelihoods, new questions need to be asked: whether a nostalgia for work can save us, how ideas of work change conceptions of political community, how employment and unemployment alike have become malemployment, and whether the work of our desire online can be disentangled from capitalist exploitation. The biggest question, at a time when the end of work and a fully automated future are proclaimed by Silicon Valley idealists as well as by social democratic politicians and left-wing theorists, is this: how can we propose a post-work society and culture that we will actually want?
