Author Terry Martin's thirty years of teaching anatomy and physiology courses, authorship of three laboratory manuals, and active involvement in the Human Anatomy and Physiology Society (HAPS) drove his determination to create a lab manual with an innovative approach that would benefit students. Laboratory Manual for Human Anatomy and Physiology 2/e includes a cat version, fetal pig version and a rat version. Each of these versions includes sixty-one laboratory exercises, supplemental labs found online, and six cat, fetal pig, or rat dissection labs. The Main Version contains no dissection exercises. All four versions are written to work well with any anatomy and physiology text. This is a comprehensive, stand-alone laboratory manual for the one-semester physiology course taught at the undergraduate level. It can accompany any physiology textbook on the market. It reinforces those principles that are fundamental to all courses on physiology. The strengths of this lab manual are its emphasis of hands-on experiments, a practical balance of background information, and clear procedural instructions. Provides all of the anatomy and physiology knowledge a massage therapist needs in a way they can better understand! Applied Anatomy and Physiology for Manual Therapists is a clear, accurate, simple, and comprehensive A&P textbook that focuses on the needs of students in manual therapy education programs. It is a focused text that deliberately emphasizes the information manual therapists need to be familiar with in order to understand the benefits, effects, indications, and contraindications of their specific form of manual therapy. The text includes detailed information not covered in standard A&P texts, adding an entire chapter on neuromuscular and myofascial connections (Chapter 8), and separating the structure and function of the lymphatic system (Chapter 11) from immunity and healing (Chapter 12). This, along with chapter features such as Manual Therapy Applications, Pathology Alerts, and What Do You Think questions, help readers build bridges between the scientific facts and the application of that information to their therapeutic practice. Terry Martin, author of the best-selling laboratory manuals to accompany the Hole's Human Anatomy & Physiology texts, has written a stand alone laboratory manual. This series of laboratory manuals (main – no dissection, cat dissection, fetal pig dissection, and rat dissection) will incorporate Terry's clear, concise writing style. These manuals are not associated with any one text and were created for use with any anatomy and physiology text. The manuals also feature incredible artwork and photos. It can be packaged with Ph.I.L.S. 4.0. In Touch With Students. In Touch With Instructor Needs. In Touch with Educational Needs. In Touch with Technology.
