The Game-Centred Approach to Sport Literacy Mar 17 2020 The Game Centred Approach (GCA) is the ideal framework for coaches and teachers to develop comprehensive tactical or technical lessons for any game, both in physical education and in extracurricular sport contexts. Learning about the pedagogical models included in this approach has never been easier thanks to this short introductory guide. The book helps the reader acquire the skills needed to design effective session plans, regardless of the sport that is being taught or coached. It introduces the core concepts underpinning the GCA model, complemented by practical examples of tasks and strategies for each game category and assessment instrument. This is essential reading for all educators, coaches or sports professionals who wish to improve their teaching or coaching to enhance their students and players’ physical literacy and sport competence. It is also invaluable reading for any student or researcher working in physical education, sport coaching or sport pedagogy.

Marriage and Family Therapy, Second Edition Aug 22 2020 This text provides students of family therapy with a unique opportunity to understand and compare the inner workings of 14 traditional and non-traditional family therapy models. The book demonstrates, through innovative “guiding templates,” how the different therapeutic models are applied in an actual family therapy situation. The second edition features a new chapter on neuroscience, new interviews with master therapists on topics such as LGBT families, EMDR and research, and coverage of ethical issues concerning electronic safety and telephonic therapy. Overviews of every model include history, views of change, views of the family, and the role of the therapist. Chapters on every model also provide responses to one, realistic case study with commentary and analysis by master therapists to illustrate how each one addresses the same scenario. Interviews with master therapists illustrate how each mode of therapy actually “works” and how therapists “do it.” Print version of the book includes free, searchable, digital access to the entire contents! New to the Second Edition: Examines neuroscience and its role in family therapy New chapter on solution focused narrative therapy with families Includes enhanced coverage of self-care and mindfulness for the therapist Contains educator resources including instructor’s manual, PowerPoint slides, and a test bank Updated references provide current developments in the field of marriage and family therapy Provides insight on submitting research articles for publication through an interview with a current journal editor Reports on current, revised ethical guidelines from the AAMFT Key Features: Provides a guiding template for each family therapy model from assessment through termination Describes a practice-oriented approach to family therapy Uses a single case study throughout the book where different approaches to therapy are applied by master therapists Introduces the theory, history, theoretical assumptions, techniques, and components of each model Includes numerous interviews, case study commentary, and analyses by master therapists

Designing Effective Feedback Processes in Higher Education Jul 01 2021 Feedback is one of the most powerful influences on student achievement, yet it is difficult to implement productively within the constraints of a mass higher education system. Designing Effective Feedback Processes in Higher Education: A Learning-Focused Approach addresses the challenges of developing effective feedback processes in higher education, combining theory and practice to equip and empower educators. It places less emphasis on what teachers do in terms of providing commentary, and more emphasis on how students generate, make sense of, and use feedback for ongoing improvement. Including discussions on promoting student engagement with feedback, technology-enabled feedback, and effective peer feedback, this book: Contributes to the theory and practice of feedback in higher education by showcasing new paradigm feedback thinking focused on dialogue and student uptake Synthesises the evidence for effective feedback practice Provides contextualised examples of successful innovative feedback designs analysed in relation to relevant literature Highlights the importance of staff and student feedback literacy in developing productive feedback partnerships Supports higher education teachers in further developing their feedback practice. Designing Effective Feedback Processes in Higher Education: A Learning-Focused Approach contributes to the theory and practice of higher education pedagogy by re-evaluating how feedback processes are designed and managed. It is a must-read for educators, researchers, and academic developers in higher education who will benefit from a guide to feedback research and practice that addresses well recognised challenges in relation to assessment and feedback.

Health Equity Mar 09 2022 Health Equity: A Solutions-Focused Approach is a comprehensive textbook that illustrates existing conditions of health disparities across a range of populations in the United States, positions those disparities within the broader sociopolitical framework that leads to their existence, and most importantly, presents specific ways in which health equity solutions can be designed and implemented. Presenting current theoretical foundations, cultural context, and evidence-based models and interventions all in one, this textbook provides students with the basis to achieve greater health equity in their communities. Edited by award-winning authors and featuring contributions from diverse experts in public health, sociology, psychology, and medicine, this groundbreaking text goes beyond a traditional approach to risk factors and disparities and emphasizes the central role that health equity initiatives must play in public health research and practice. The book is divided into three sections, with Section I focusing on providing the context of health equity research and practice. Chapters are structured in a way that both new and experienced students in the field will develop a deeper understanding of topics such as prejudice and discrimination; frameworks and theories; and research and collaboration approaches. Section II addresses the current knowledge of specific populations impacted by issues related to health equity, including African American, Latinx and Hispanic, Asian, American Indian and Alaska Native, Native Hawaiian and Pacific Islander, LGBTQ, Veteran, People with Disabilities, and many more. Authored or co-authored by members of the community being discussed, each of these chapters summarizes how health disparities impact the group, ongoing population-specific models of disparities and equity, emerging programs for achieving health equity, coverage of the most relevant aspects of intersectionality, and concluding exercises such as case studies and current events. Section III then highlights the role of cultural humility in achieving health equity. With its solutions-focused and community-affirming approach, Health Equity provides graduate and undergraduate students of public health with evidence-based models to help advance health through diversity, inclusion, and social justice. Key Features: Origins and Theories – Discusses the sociocultural and political origins of health disparities and the major theories that underlie an understanding of health equity Solutions-Focused – Describes emerging models and gives best practices in designing new programs Diverse Population Coverage – Provides historical context, sociocultural dynamics, and population-specific evidence-based programs from the voices of the communities being discussed Intersectionality Perspective – Highlights the role that overlapping and interdependent identities play in promoting health equity and the interventions that build from this perspective Case Studies and Real-World Examples – Demonstrates how to apply health equity improvement approaches in different contexts eBook access –Included with print purchase for use on most mobile devices or computers Instructor’s Packet – With an Instructor’s Manual, PowerPoint slides, Test Bank, and a Sample Syllabus

Introduction to Mediation, Moderation, and Conditional Process Analysis, Second Edition Feb 14 2020 Lauded for its easy-to-understand, conversational discussion of the fundamentals of mediation, moderation, and conditional process analysis, this book has been fully revised with 50% new content, including sections on working with multicategorical antecedent variables, the use of PROCESS version 3 for SPSS and SAS for model estimation, and annotated PROCESS v3 outputs. Using the principles of ordinary least squares regression, Andrew F. Hayes carefully explains procedures for testing hypotheses about the conditions under and the mechanisms by which causal effects operate, as well as the moderation of such mechanisms. Hayes shows how to estimate and interpret direct, indirect, and conditional effects; probe and visualize interactions; test questions about moderated mediation; and report different types of analyses. Data for all the examples are available on the companion website (www.afhayes.com), along with links to download PROCESS. New to This Edition *Chapters on using each type of analysis with multicategorical antecedent variables. *Example analyses using PROCESS v3, with annotated outputs throughout the book. *More tips and advice, including new or revised discussions of formally testing moderation of a mechanism using the index of moderated mediation; effect size in mediation analysis; comparing conditional effects in models with more than one moderator; using R code for visualizing interactions; distinguishing between testing interaction and probing it; and more. *Rewritten Appendix A, which provides the only documentation of PROCESS v3, including 13 new preprogrammed models that combine moderation with serial mediation or parallel and serial mediation. *Appendix B, describing how to create customized models in PROCESS v3 or edit preprogrammed models.

Transforming Generalized Anxiety Nov 12 2019 Transforming Generalized Anxiety: An Emotion Focused Approach examines an approach to treating generalized anxiety disorder (GAD) which attempts to uncover the deeper, underlying emotional experiences that clients are afraid of. It also demonstrates how these painful experiences can be transformed in therapy into a form of emotional resilience by generating experiences of self-compassion and healthy, boundary setting, protective anger. Though most of the literature on treating GAD is dominated by Cognitive Behavior Therapy, this book presents emotion-focused therapy as an alternative treatment of this condition. The emotional resilience this particular approach instills serves as a resource when encountering triggers of emotional vulnerability, but also decreases the client’s need to avoid hitherto feared triggers and the emotional experiences they bring. Developed in a series of research studies, and illustrated with reference to case examples, this book offers a practical, theoretically informed, evidence based guide, to conducting therapy with clients. Using clinical material, and applying the outcome of a series of research studies, Transforming Generalized Anxiety will equip psychotherapists and counsellors with the means to help GAD clients transform core painful experiences into a sense of empowerment and inner confidence.

Solution-Focused Supervision Sep 03 2021 ? ? New data have come to light through the Solution Focused Brief Therapy Association Archive (hereafter, the Archive). This information is drawn from manuscripts and video featuring one of the SF founders, Insoo Kim Berg, MSW. Archive video examples of Ms. Berg conducting supervision, therapy teams, and case consultation as well as unpublished manuscripts written by her provide unique opportunities to illustrate specific assumptions and techniques rarely seen before. The documents outline Ms. Berg’s philosophy, assumptions, and techniques to conduct supervision, and the videos offer in vivo examples of her supervision and team/case consultation style. Together, the Archive materials offer a rich resource for a book that both informs and illustrates SFS?.

Doing What Works in Brief Therapy Sep 15 2022 Doing What Works in Brief Therapy: A Strategic Solution Focused Approach is both a set of procedures for the therapist and a philosophy– one that is shared with clients and one that guides the work of the therapist. This second edition continues its excellence in offering clinicians a guide to doing what works in brief therapy- for whom, and when and how to use it. Psychotherapy that follows these guidelines validates the client’s most important concerns – and it often turns out to be surprisingly brief. Author, Ellen Quick integrates strategic and solution focused therapy and includes guidelines for tailoring technique and interventions to client characteristics and preferences. With clinically rich examples throughout, this book offers applications for couples, including indications for individual or conjoint sessions. Chapter summaries highlighting key points Presents ways of eliciting what clients most want to remember Describes the "Doing What Works Group," including outcome research findings and all materials needed to run the group Addresses the relationship among the positive psychology movement and this approach and the potential for collaboration Emphasizes an acceptance-based stance and how acceptance commonly leads to change Proposes that "doing what works and changing what doesn't" can provide a transtheoretical perspective for therapists of any orientation

An Invariant-Based Approach to Second Language Acquisition May 19 2020 The challenge to improve second language acquisition efficiency has always been at the heart of education because a good command of a language provides new opportunities to manipulate information and apply acquired knowledge and skills to novel problems in new situations. Thus, there is a necessity for creating an alternative to either task-based or form-focused methods commonly employed in today’s instruction. An Invariant-Based Approach to Second Language Acquisition: Emerging Research and Opportunities is an essential reference source that elaborates on traditional 2L concepts and terms and provides new practical tools and mechanisms for developing student communicative competencies. Featuring research on topics such as syllabus design, language interpretation, and speech types, this book is ideally designed for educators, administrators, researchers, and academicians.

Cengage Advantage Books: Strategic Public Relations: An Audience-Focused Approach Aug 14 2022 With nearly thirty years of experience as both a public relations teacher and practitioner, Barbara Diggs-Brown has written a text based on her unwavering belief that to practice effective public relations today requires strategic thinking and audience focus, which can only be accomplished by listening and hearing audiences through formative, process, and evaluative research. In addition to highlighting audience-focused principles and techniques of audience research and recurring assessment, STRATEGIC PUBLIC RELATIONS: AN AUDIENCE-FOCUSED APPROACH is based on the premise that public relations is a management function, one coordinated with an organization’s other management divisions. Intended for undergraduate courses in PR, serving both majors in the field and nonmajors, this text provides a comprehensive survey of PR’s foundations, processes, tactics, and contexts. Tools for Effective Therapy with Children and Families Feb 08 2022 Tools for Effective Therapy with Children and Families provides mental health professionals with step-by-step tools and strategies for effective therapeutic outcomes with children and their families. An integration of solution-focused brief therapy and play therapy, this groundbreaking book is uniquely suited to clinicians working with school-aged children and their parents. Tools for Effective Therapy with Children and Families uses clearly articulated and creative play activities to elicit conversations about solutions, successes, and collaborative goals with clients. Session transcripts and technique illustrations throughout the chapters allow clinicians to see the solution-focused approach in action.

Cultivating Rural Education Oct 04 2021 Rural life is more complex than it is perhaps credited. This edited volume explores several themes that highlight such complexities, particularly in terms of what they imply for rural teaching and learning. These themes include the geographic, demographic, and socioeconomic diversity within and across rural communities; the notion that rurality is not a deficit but rather a context; and the array of novel and interesting ways to build upon rural assets and overcome challenges so that rural students are not afforded fewer educational opportunities simply by virtue of their zip code. More practically, this book offers counsel for readers who may be interested in learning more about rural circumstances so that they can make informed and responsive decisions about policies and programs targeting rural students, educators, and schools. Praise for Cultivating Rural Education: "Making appropriate decisions about policy and practice in rural education settings demands an understanding of rural communities and the nuances of rural lifeways that are not standard fare in most decision-makers’ professional backgrounds and preparation. This book clearly and insightfully helps guide readers to those understandings, offering a valuable resource both for individuals with nonrural backgrounds (as a thorough introduction to the salient contexts of rural education) and for those with rural backgrounds (as a guide for framing/reframing and clarifying their existing understandings)." Jerry D. Johnson, Professor and Lydia E. Skeen, Endowed Chair in Education Kansas State University "Howley and Redding have co-edited a book that brings to life the complexity of rural people and places and helps readers understand what this complexity means for rural education. The range of voices and research in Cultivating Rural Education demonstrates how varied rural places are, how real the educational challenges rural schools and districts face are, and how much strength and ingenuity rural people bring to the table to address those challenges." Robert Mahaffey, Executive Director Rural School and Community Trust The book Cultivating Rural Education gives an actionable planning process to understand, define, and cultivate our rural schools and communities. The community and school are so closely tied together, it is time for our stakeholders and community members to highlight what is right and adjust the areas that need adjusting to help save and establish a true path(s) to sustainability for Rural America." Allen Pratt, Executive Director National Rural Education Association

Solution-Focused Brief Therapy Jun 12 2022 Solution-Focused Brief Therapy, by Johnny S. Kim, is the first book in the field to provide a practical overview of the essentials of solution-focused brief therapy (SFBT) from a multicultural perspective, including intervention skills, research, applications, and implications for practice. Case examples illustrate SFBT in action with a wide range of client populations. In addition, the book incorporates recommendations from the recently developed and approved SFBT treatment manual, published by the Solution-Focused Brief Therapy Association.

Solution-Focused Therapy with Children and Adolescents Feb 25 2021 Solution-Focused Therapy with Children and Adolescents offers mental health professionals an integration of creative and playful approaches and solution-focused therapy. The author presents developmentally appropriate and expressive alternatives to oral

communication including sandtray, writing, puppetry, drawing and coloring, photography, and music. The text presents an overview of strength-based and creative approaches with a focused examination of the philosophy and process of solution-focused therapy, then divides chapters into specific stages of therapy—beginnings, searching for treasure, setting goals, and ending the session—with creative techniques offered in each section. The final chapter addresses working with children and adolescents in solution-focused groups, including how to set up groups and progress through different group stages, presenting specific techniques and activities focused on each stage of the group process.

Acute Neuro Care Oct 24 2020 The book provides detailed information on all major neuroemergencies, and includes a detailed checklist for practical care during the first hour of an emergency. Reinforcing the concept of quality care for better outcomes in patients with neurological diseases, the book discusses approaches to comatose patients, neurological evaluation, neuropharmacology, neuroradiology, traumatic brain and spine injury, and various other neurological disorders. The field of neuroanesthesiology and neurocritical care has expanded with the advent of newer, complex surgeries, and neurocritical care is becoming an established subspecialty of neuroscience. Neurological emergencies require special care since prevention of secondary damage to the brain is of paramount importance. A valuable resource for intensivists, neurointensivists, emergency medicine physicians, neurology and neurosurgeons and nursing professionals involved in neurocare, this book also serves as study material for participants of the two-day course on “Acute Neuro Care” designed by the Indian Society of Neuroanesthesiology and Critical Care (ISNACC).

Learning Emotion-focused Therapy Oct 12 2019 "In Learning Process-Experiential Therapy: The Process-Experiential Approach to Change, the originators of process-experiential therapy describe in detail the various tasks and techniques of this theoretically grounded, empirically supported humanistic therapy, while emphasizing the importance of the therapeutic relationship. The authors, Robert Elliott, Jeanne C. Watson, Rhonda N. Goldman, and Leslie S. Greenberg, well-respected scholars and leading figures in the field, discuss theory, case formulation, treatment, and research in a way that makes this complex form of therapy accessible to all readers. Particularly valuable are their careful moment-to-moment exchanges in extended case examples, which show the reader how deliberate and skillful use of these techniques can bring about change. This informative book will be of great practical value to therapists and students learning process-experiential therapy as well as to those who teach this mode of psychotherapy."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Solution Focused Approach with Children and Young People Jan 19 2023 The Solution Focused Approach with Children and Young People: Current Thinking and Practice brings together leading figures and innovative practitioners from different professions, contexts and countries to provide a unique overview of Solution Focused work with children and young people. Presenting a range of applications in individual, group and community work, it puts the spotlight on diverse fields, exploring how the Solution Focused approach can work in real-world contexts. This book showcases a powerful, engaging approach which helps children and young people find the resources and strengths to manage difficulties and make the most of their lives. It contains interesting case studies, narrative descriptions of original practice, programmes of work developed using Solution Focused principles, and thought-provoking discussions of key elements of practice. With chapters presenting perspectives from coaching, therapy, consultancy and education, and applications including learning assessments, child protection, bereavement, edge of care, and youth offending, the book provides an overview of the current state of practice and provides pointers to potential new developments. The Solution Focused Approach with Children and Young People will help both experienced practitioners and those new to the approach to develop and update their knowledge and skills, as well as introducing them to creative and cutting-edge tools to inspire fresh ideas and thinking. It will be essential reading for Solution Focused practitioners and students, as well as coaches, social workers, school counsellors and mental health professionals working with children and young people.

Solution-focused Approaches Apr 17 2020 Solution-focused brief therapy uses a range of techniques underpinned by theoretical assumptions about people and what is helpful in promoting change. This is done through empowering them to take appropriate responsibility for their lives. This introductory book is for people who wish to learn more about the theory and practice. As solution-focused work developed in therapeutic contexts, many examples are drawn from encounters between counselors in various settings and people who come to them by various routes. But importantly, the book also includes examples that show how solution-focused approaches can be used by social, care, community, and justice workers going about their work in statutory and voluntary agencies with the different demands that these make. The book outlines the theoretical influences on solution-focused approaches and contrasts them with more traditional approaches. It allows the reader to think about what informs their current practice and how a solution-focused approach may be different, giving ideas for developing practice in a reflective way. It outlines the practice principles and techniques involved in solution-focused work, using an interview structure that provides a logical flow of ideas. Additionally, the book outlines some outcome studies and evidence for effectiveness of solution-focused approaches, with a further section on useful websites and further reading.

Chemistry: An Atoms First Approach Jan 15 2020 Steve and Susan Zumdahl's texts focus on helping students build critical thinking skills through the process of becoming independent problem-solvers. They help students learn to think like a chemists so they can apply the problem solving process to all aspects of their lives. In CHEMISTRY: AN ATOMS FIRST APPROACH, the Zumdahls use a meaningful approach that begins with the atom and proceeds through the concept of molecules, structure, and bonding, to more complex materials and their properties. Because this approach differs from what most students have experienced in high school courses, it encourages them to focus on conceptual learning early in the course, rather than relying on memorization and a plug and chug method of problem solving that even the best students can fall back on when confronted with familiar material. The atoms first organization provides an opportunity for students to use the tools of critical thinkers: to ask questions, to apply rules and models and to evaluate outcomes. Animal-Assisted Brief Therapy Apr 10 2022 Learn to use a powerful tool in Solution-Focused Brief Therapy—a pet Animal Assisted Activities/Therapy (AAA/T) is an innovative intervention in which an animal becomes a crucial—and highly effective—part of the treatment process. Pet-Assisted Brief Therapy: A Solution-Focused Approach gives therapists the tools they need to begin and maintain an effective treatment program that meaningfully merges dogs and other therapy animals with Solution-Focused Therapy (SFT). This unique book clearly explains how AAA/T integrated with SFT in one substance abuse counseling program. It provides a revealing description of the program’s challenges and successes, and discusses the possibilities for AAA/T implementation in other agencies. The authors review in detail the multitude of scenarios where animals can add a valuable dimension for treatment with clients on specific issues. Animal-Assisted Brief Therapy: A Solution-Focused Approach provides therapists with concrete examples of how to appropriately implement AAA/T to cultivate positive effects in treatment. The book explains how this loving and patient therapy for clients need not be the difficult challenge that it at first appears to be. This resource takes you step by step through the process, showing what practical strategies can be used to offset most obstacles and unknowns. This one-of-a-kind guide clearly explains how to blend and structure the numerous aspects of AAA/T with Solution Focused Therapy to become a more effective treatment program. Appendices provide AAA/T resources, sample policy and procedures, and training resources across the United States. Animal-Assisted Brief Therapy: A Solution-Focused Approach discusses: the history of AAA/T common values between AAA/T and Solution-Focused Therapy the principles and goals of SFT how to understand canine culture the creation of a successful AAA/T program phobias, allergies, liabilities, and insurance therapy dogs’ needs common interventions therapy with children therapy with adolescents therapy with adults therapy with substance abusing clients Animal-Assisted Brief Therapy: A Solution-Focused Approach provides a comprehensive look at AAA/T and is perfect for therapists struggling to find new and effective ways to work with clients; therapists trying to utilize this approach in their practice; administrators and clinical supervisors wanting to implement AAA/T at their agency; educators; and students.

Transforming Emotional Pain in Psychotherapy Sep 22 2020 Emotion-focused therapy is a research-informed psychological therapy that to date has mainly been studied in the context of depression, trauma and couple distress. The evidence suggests that this therapy has a lasting and transformative effect. Ladislav Timulak presents EFT as a particular therapeutic approach that addresses psychological human suffering, offering a view that puts more emphasis on attending to the distress, rather than avoiding or suppressing it. Focusing on the latest developments in EFT, Transforming Emotional Pain in Psychotherapy presents a theory of human suffering and a model of therapy that addresses that suffering. The model of suffering assumes that the experienced emotional pain is a response to an injury that prevents or violates the fulfilment of the basic human needs of being loved, safe, and acknowledged. This book focuses on a particular way of transforming emotional pain in psychotherapy through: helping the client to tolerate the pain; assisting the client to identify the core of the difficult emotional experiences; identifying the needs connected to the core pain which are unmet or being violated, and responding (with compassion and protective anger) to the underlying needs of the client that transforms the original pain. Transforming Emotional Pain in Psychotherapy provides an account of how emotional pain can be conceptualised and how it can be addressed in therapy. It provides practical tips for therapists working with emotional pain and shows how it can then be made more bearable and transformed allowing the client to be more sensitive to the pain of others, and to seek support when needed. This book will be essential reading for clinical and counselling psychologists, psychotherapists and counsellors in practice and training, as well as for fully qualified professionals undergoing further training in EFT.

Brief Coaching Dec 18 2022 Brief Coaching offers a new approach to coaching by considering how the client will know when they have reached their goal, and what they are already doing to get there. The coach aims to work towards the solution rather than working away from the problem, so that the client's problem is not central to the session, but instead the coach and the client work towards the client's preferred future. This book employs case examples and transcripts of sessions to offer guidance on: looking for resources rather than deficits exploring possible and preferred futures examining what is already contributing to that future treating clients as experts in all aspects of their lives. This practical guide includes summaries and activities for the coach to do with the client and will therefore be a useful tool for both new and experienced coaches, as well as therapists branching into coaching who want to add to their existing skills.

Model Based Approach for Energy and Resource Efficient Machining Systems Nov 24 2020 This book provides a concept to analyze and increase the energy and resource efficiency of machining systems. Machining systems are widely used to produce workpieces in large quantities and with complex geometrical shapes. These systems, however, are also relevant in terms of energy and resource consumption, which is strongly connected to the choice of cutting fluid strategy. Within the focus of the concept, cutting fluid connects the elements of the machining system and results in interactions between them. Based on this description and an extensive literature review, a modeling approach is developed that comprises the relations between process parameters, cutting fluid strategies, and relevant machining system elements. The performance of the machining system is assessed with regard to environmental, economic as well as technological indicators and improved by various organizational and technical measures. The exemplary application of the developed concept is carried out in the context of two case studies and also indicates the corresponding effects of improvement measures.

The Person-Centred Approach to Therapeutic Change Jul 21 2020 From the Foreword `It is an honour to be asked to write a foreword for this new book by Michael McMillan. I have been excited about this book ever since I read early drafts of its first two chapters some time ago at the birth of the project. At different times thereafter I have read other parts and my consistent impression has been that this is an author who has both a sophisticated academic understanding of the material and a great skill in communicating that widely. Those two qualities do not often go together! The book is about change. After a first chapter in which the author introduces us to the person-centred concept of the person, chapter two is devoted to the change process within the client, including a very accessible description of Rogers' process model. Chapter three goes on to explore why and how change occurs in the human being, while chapter four introduces the most up-to-date person-centred theory in relation to the nature of the self concept and its changing process. Chapters five and six explore why change occurs in therapy and the conditions that facilitate that change, while chapter seven looks beyond the core conditions to focus on the particular quality of presence, begging the question as to whether this is a transpersonal/transcendental quality or an intense experiencing of the core conditions themselves. This is an intensely modern book particularly in its postmodern emphasis. Rogers is sometimes characterised as coming from modernist times but he can also be seen as one of the early post modernists in his emphasis on process more than outcome and relationship more than personal striving. The modern nature of the book is also emphasised by a superb analysis of the relationship between focussing and person-centred therapy in Chapter five, linking also with Polanyi's notion of indwelling in this and other chapters. In suggesting that in both focussing and person-centred therapy the therapist is inviting the client to 'indwell' himself or herself, the author provides a framework for considering many modern perceptions of the approach including notions such as 'presence' and 'relational depth'. Also, the link with focussing is modern in the sense that the present World Association for the approach covers a fairly broad family including traditional person-centred therapists, experiential therapists, focussing-oriented therapists and process-guiding therapists. Important in this development is the kind of dialogue encouraged by the present book' - Dave Mearns, Strathclyde University The belief that change occurs during the therapeutic process is central to all counselling and psychotherapy. The Person-Centred Approach to Therapeutic Change examines how change can be facilitated by the counsellor offering empathy, unconditional positive regard and congruence. The Person-Centred Approach to Therapeutic Change outlines the main theoretical cornerstones of the person-centred approach and then, applying these, describes why change occurs as a result of a person-centred therapeutic encounter. The author explores the counselling relationship as an environment in which clients can open themselves up to experiences they have previously found difficult to acknowledge and to move forward. Integral to the person-centred approach is Carl Rogers' radical view that change should be seen as an ongoing process rather than an alteration from one fixed state to another. In Rogers' view psychological health is best achieved by the person who is able to remain in a state of continual change. Such a person is open to all experiences and is therefore able to assimilate and adapt to new experiences, whether 'good' or 'bad'. By focusing explicitly on how change is theorized and facilitated in counselling, this book goes to the heart of person-centred theory and practice, making it essential reading for trainees and practitioners alike.

Working with Violence and Confrontation Using Solution Focused Approaches Jun 19 2020 An authoritative, interdisciplinary book which outlines how solution focused practice is particularly effective in addressing violent behaviour in clients and service users, encompassing work with both adults and children. Solution focused approaches have been used successfully with a range of violent behaviours from school-based bullying to severe domestic violence, as well as with victims of violence. Solution focused approaches hold people accountable for building solutions to their violent behaviour. The book shows how to engage clients in solution talk as opposed to problem talk, set useful goals and help clients to develop new behaviours. It outlines the practice principles and working techniques that make up solution focused practice with physical, emotional and sexual violence. Illustrative case studies and practice activities are provided. This book is suitable for anyone working to help reduce violent behaviour, including social workers, counsellors, therapists, nurses, probation workers and youth offending teams.

Solution-Focused Play Therapy Nov 05 2021 Solution-Focused Play Therapy is an essential text that blends the process of play therapy with solution-focused therapy. With a focus on child strengths and resources, this book identifies key concepts and principles in solution-focused play therapy (SFPT). The author provides neurobiological and developmental support for SFPT and guidance on how practitioners can transition from using a non-directive approach to a more directive and activity-based approach based on the developmental needs of the child. Chapters describe the 12 basic skills needed for employing this approach with children of all ages and their families. Harnessing a strengths-oriented approach, the author presents expressive ways to use key SFPT techniques, including the miracle question, scaling, finding exceptions, and end-of-session feedback. Clinicians will come away from the book with a suite of interventions, strategies, handouts, and forms that can be employed with children of all ages and their families, from strength-based assessment and treatment planning to the final celebration session.

Brief Coaching with Children and Young People Apr 29 2021 Brief Coaching with Children and Young People: A Solution Focused approach is the first book of its type to describe the thinking and practice of Solution Focused coaching with these age groups. The approach empowers young people to find their own solutions in the shortest possible time, focusing on where they want to get to rather than the details of the problem they are concerned about. The authors' emphasis on practical and straightforward techniques and materials will equip all those interested in working with and supporting young people and their families to help them achieve their hopes for the future. The book is illustrated with numerous examples from the coaching practice of the authors in different settings, with a particular emphasis on challenging cases. As a whole, it serves as a key resource for working with children and young people, but each chapter can also be read individually to enhance the reader's understanding of the topic. Downloadable resources are available online which enhance the practicality of the text. Ratner and Yusuf have created a practical, jargon-free resource for all those who work with and support children, young people and their families. It will be invaluable for coaches, therapists and counsellors as well as anyone who interacts with children and young people, including social workers, teachers and mentors and foster parents.
