Recovering Liberties Mar 11 2022 One of the world's leading historians examines the great Indian liberal tradition, stretching from Rammohan Roy in the 1820s, through Dadabhai Naoroji in the 1880s to G. K. Gokhale in the 1900s. This powerful new study shows how the ideas of constitutional, and later 'communitarian' liberals influenced, but were also rejected by their opponents and successors, including Nehru, Gandhi, Indian socialists, radical democrats and proponents of Hindu nationalism. Equally, *Recovering Liberties* contributes to the rapidly developing field of global intellectual history, demonstrating that the ideas we associate with major Western thinkers – Mills, Comte, Spencer and Marx – were received and transformed by Indian intellectuals in the light of their own traditions to demand justice, racial equality and political representation. In doing so, Christopher Bayly throws fresh light on the nature and limitations of European political thought and re-examines the origins of Indian democracy.

Interlopers of Empire Dec 28 2020 This work is the first comprehensive history of the Lebanese migrant communities of colonial French West Africa, a vast expanse that covered present-day Senegal, Côte d'Ivoire, Mali, Guinea, Benin and Mauritania. Where others have concentrated on the commercial activities of these migrants, casting them as archetypal middlemen, this work reconstructs not just their economic strategies, but also their social and political lives. Moreover, it examines the fraught responses of colonial Frenchmen to the unsettling presence of these interlopers of empire--responses which, with their echoes of metropolitan racism, helped to shape the ways in which Lebanese migrants represented themselves and justified their place in West Africa. This is a work which attempts not just to reshape broader understandings of diasporic life-of Janus-like existences lived in transit between distant locales, and de- pendent on the constant to-and-fro of people, news, and goods--but also to challenge the way we think about empires, and the relations between their constituent territories and diverse inhabitants.

[The Petite Bourgeoisie in Europe 1780-1914](#) Nov 19 2022 An overview of the social, economic, cultural and political development of the petite bourgeoisie in modern Europe is provided here. This study brings together both primary research and secondary literature to assess the group's role in European social history.

The Black Hole of Empire Mar 31 2021 When Siraj, the ruler of Bengal, overran the British settlement of Calcutta in 1756, he allegedly jailed 146 European prisoners overnight in a cramped prison. Of the group, 123 died of suffocation. While this episode was never independently confirmed, the story of "the black hole of Calcutta" was widely circulated and seen by the British public as an atrocity committed by savage colonial subjects. *The Black Hole of Empire* follows the ever-changing representations of this historical event and founding myth of the British Empire in India, from the eighteenth century to the present. Partha Chatterjee explores how a supposed tragedy paved the ideological foundations for the "civilizing" force of British imperial rule and territorial control in India. Chatterjee takes a close look at the justifications of modern empire by liberal thinkers, international lawyers, and conservative traditionalists, and examines the intellectual and political responses of the colonized, including those of Bengali nationalists. The two sides of empire's entwined history are brought together in the story of the Black Hole memorial: set up in Calcutta in 1760, demolished in 1821, restored by Lord Curzon in 1902, and removed in 1940 to a neglected churchyard. Challenging conventional truisms of imperial history, nationalist scholarship, and liberal visions of globalization, Chatterjee argues that empire is a necessary and continuing part of the history of the modern state. Nationalizing Empires Apr 12 2022 The essays in *Nationalizing Empires* challenge the dichotomy between empire and nation state that for decades has dominated historiography. The authors center their attention on nation-building in the imperial core and maintain that the nineteenth century, rather than the age of nation-states, was the age of empires and nationalism. They identify a number of instances where nation building projects in the imperial metropolis aimed at the preservation and extension of empires rather than at their dissolution or the transformation of entire empires into nation states. Such observations have until recently largely escaped theoretical reflection.

Remaking the Modern World 1900 - 2015 Jun 02 2021 The sequel and companion volume to C.A. Bayly's ground-breaking *The Birth of the Modern World, 1780-1914*, this wide-ranging and sophisticated study explores global history since the First World War, offering a coherent, comparative overview of developments in politics, economics, and society at large. Written by one of the leading historians of his generation, an early intellectual leader in the study of World History Weaves a clear narrative history that explores the themes of politics, economics, social, cultural, and intellectual life throughout the long twentieth century Identifies the themes of state, capital, and communication as key drivers of change on a global scale in the last century, and explores the impact of those ideas Interrogates whether warfare was really the pre-eminent driving force of twentieth-century history, and what other ideas shaped the course of history in this period Explores the causes behind the resurgence of local conflict, rather than global-scale conflict, in the years since the turn of the millennium Delves into the narrative of inequality, a story that has shaped and been shaped by the events of the last hundred years Part of *The Blackwell History of the World Series* The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past, for every curious person in every part of the world. It will comprise some two dozen volumes, of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time. The volumes are narrative in form, giving balanced attention to social and cultural history (in the broadest sense) as well as to institutional development and political change. Each provides a systematic account of a very large subject, but they are also both imaginative and interpretative. The Series is intended to be accessible to the widest possible readership, and the accessibility of its volumes is matched by the style of presentation and production.

The Shaping of Modern Britain Aug 16 2022 In this wide-ranging history of modern Britain, Eric Evans surveys every aspect of the period in which Britain was transformed into the world's first industrial power. By the end of the nineteenth century, Britain was still ruled by wealthy landowners, but the world over which they presided had been utterly transformed. It was an era of revolutionary change unparalleled in Britain - yet that change was achieved without political revolution. Ranging across the developing empire, and dealing with such central institutions as the church, education, health, finance and rural and urban life, *The Shaping of Modern Britain* provides an unparalleled account of Britain's rise to superpower status. Particular attention is given to the Great Reform Act of 1832, and the implications of the 1867 Reform Act are assessed. The book discusses: - the growing role of the central state in domestic policy making - the emergence of the Labour party - the Great Depression - the acquisition of a vast territorial empire Comprehensive, informed and engagingly written, *The Shaping of Modern Britain* will be an invaluable introduction for students of this key period of British history.

Replenishing the Earth Oct 26 2020 Pioneering study of the anglophone 'settler boom' in North America, Canada, South Africa, Australia, and New Zealand between the early 19th and early 20th centuries, looking at what made it the most successful of all such settler revolutions, and how this laid the basis of British and American power in the 19th and 20th centuries.

[City on a Hilltop](#) Oct 14 2019 Since Israel's 1967 war, more than 60,000 Jewish-Americans have settled in the occupied territories, transforming politics and sometimes committing shocking acts of terrorism. Yet little is known about why they chose to live at the center of the Israeli-Palestinian conflict. Sara Yael Hirschhorn unsettles stereotypes about these liberal idealists.

[Webs of Humankind](#) Dec 08 2021 A leader in the field presents a cohesive narrative of world history that effectively addresses the main challenge of the introductory survey: how to navigate beginning students through the vast detail of the subject. McNeill uses connective webs—along which trade, religious beliefs, technologies, pathogens, and much else traveled—to organize details and keep the big picture in view. Students emerge with clear takeaways and a strong sense of the basic dynamics of world history. Together with digital resources that amplify the webs approach and highlight diverse types of evidence, John McNeill's *The Webs of Humankind* offers a clear and effective teaching tool for the world history survey course.

Ancient Religions, Modern Politics Mar 19 2020 Why Islam is more political and fundamentalist than other religions Why does Islam play a larger role in contemporary politics than other religions? Is there something about the Islamic heritage that makes Muslims more likely than adherents of other faiths to invoke it in their political life? If so, what is it? *Ancient Religions, Modern Politics* seeks to answer these questions by examining the roles of Islam, Hinduism, and Christianity in modern political life, placing special emphasis on the relevance—or irrelevance—of their heritages to today's social and political concerns. Michael Cook takes an in-depth, comparative look at political identity, social values, attitudes to warfare, views about the role of religion in various cultural domains, and conceptions of the polity. In all these fields he finds that the Islamic heritage offers richer resources for those engaged in current politics than either the Hindu or the Christian heritages. He uses this finding to explain the fact that, despite the existence of Hindu and Christian counterparts to some aspects of Islamism, the phenomenon as a whole is unique in the world today. The book also shows that fundamentalism—in the sense of a determination to return to the original sources of the religion—is politically more adaptive for Muslims than it is for Hindus or Christians. A sweeping comparative analysis by one of the world's leading scholars of premodern Islam, *Ancient Religions, Modern Politics* sheds important light on the relationship between the foundational texts of these three great religious traditions and the politics of their followers today.

Walking Histories, 1800-1914 May 01 2021 Few historians have written about walking, despite its obvious centrality to the human condition. Focusing on the period 1800-1914, this book examines the practices and meanings of walking in the context of transformative modernity. It boldly suggests that once historians place walking at the heart of their analyses, exciting new perspectives on themes central to the 'long nineteenth century' emerge. *Walking Histories, 1800-1914* adopts a global perspective, including contributions from specialists in the history and culture of Great Britain, North America, Australia, Russia, East-Central Europe, and South Asia. Critically engaging with recent research, the contributions within offer fresh insights for academic experts, while remaining accessible to student readers. This book will be essential reading for those interested in movement, travel, leisure, urban history, and environmental history.

[The Birth of the Modern World, 1780-1914](#) Jan 21 2023 This book is a thematic history of the world from 1780, the pivotal year of the revolutionary age, to the outbreak of the First World War in 1914. It brings together historical data and arguments from different societies in order to show how interconnected the world was, even before the onset of modern globalization. "The Birth of the Modern World, 1780-1914 demonstrates how events in Asia, Africa, and South America, from the decline of the eighteenth-century Islamic empires to the anti-European Boxer rebellion of 1900 in China, had a direct impact on European and American history. Conversely, it sketches the "ripple effects" of crises such as the European revolutions and the American Civil War. The book also considers the great themes of the nineteenth-century world: the rise of the modern state, industrialization, liberalism, and the progress of world religions. Engaging and original, this book both challenges and complements the dominant regional and national approaches traditionally adopted by historians.

Nineteenth Century Europe Jan 09 2022 This engaging collection of primary sources, selected fiction excerpts, and images explores important events, figures, and themes in European history, from 1789 to 1900. 19th Century Europe offers five types of selections: memoirs of individuals who witnessed important historical events; excerpts from works of fiction; writings of influential figures and theorists; significant historical documents, and images. Primary source selections acquaint students with the writings and documents that helped shape the long 19th century European history, while the fiction selections bring historical events to the level of human life. The selections explore significant themes of this time period--modernization, liberalism, and nationalism, society and culture, the relationship between the individual and society, and the relationship between Europe and the world--enhancing students' understanding of the historical events presented in course. Both challenging and captivating, 19th Century Europe provides students with a glimpse of the emotions, ideologies, and attitudes that lie behind the facts and figures of history, allowing them to experience the past and to better understand it.

The Age of Questions Feb 10 2022 A groundbreaking history of the Big Questions that dominated the nineteenth century In the early nineteenth century, a new age began: the age of questions. In the Eastern and Belgian questions, as much as in the slavery, worker, social, woman, and Jewish questions, contemporaries saw not interrogatives to be answered but problems to be solved. Alexis de Tocqueville, Victor Hugo, Karl Marx, Frederick Douglass, Fyodor Dostoevsky, Rosa Luxemburg, and Adolf Hitler were among the many who put their pens to the task. *The Age of Questions* asks how the question form arose, what trajectory it followed, and why it provoked such feverish excitement for over a century. Was there a family resemblance between questions? Have they disappeared, or are they on the rise again in our time? In this pioneering book,

Holly Case undertakes a stunningly original analysis, presenting, chapter by chapter, seven distinct arguments and frameworks for understanding the age. She considers whether it was marked by a progressive quest for emancipation (of women, slaves, Jews, laborers, and others); a steady, inexorable march toward genocide and the "Final Solution"; or a movement toward federation and the dissolution of boundaries. Or was it simply a farce, a false frenzy dreamed up by publicists eager to sell subscriptions? As the arguments clash, patterns emerge and sharpen until the age reveals its full and peculiar nature. Turning convention on its head with meticulous and astonishingly broad scholarship, *The Age of Questions* illuminates how patterns of thinking move history.

The Transformation of the World Jul 15 2022 A panoramic global history of the nineteenth century A monumental history of the nineteenth century, *The Transformation of the World* offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, *The Transformation of the World* sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

Barricades and Borders May 13 2022 Now with a substantially revised text and fully updated bibliography, this is a comprehensive survey of European history from Napoleon Bonaparte to the First World War. Empire of Democracy Nov 14 2019 The first panoramic history of the Western world from the 1970s to the present day—from the Cold War to the 2008 financial crisis and wars in the Middle East—*Empire of Democracy* is "a superbly informed and riveting historical analysis of our contemporary era" (Charles S. Maier, Harvard University). Half a century ago, at the height of the Cold War and amidst a world economic crisis, the Western democracies were forced to undergo a profound transformation. Against what some saw as a full-scale "crisis of democracy"—with race riots, anti-Vietnam marches and a wave of worker discontent sowing crisis from one nation to the next—a new political-economic order was devised and the postwar social contract was torn up and written anew. In this epic narrative of the events that have shaped our own times, Simon Reid-Henry shows how liberal democracy, and western history with it, was profoundly reimagined when the postwar Golden Age ended. As the institutions of liberal rule were reinvented, a new generation of politicians emerged: Thatcher, Reagan, Mitterrand, Kohl. The late twentieth century heyday they oversaw carried the Western democracies triumphantly to victory in the Cold War and into the economic boom of the 1990s. But equally it led them into the fiasco of Iraq, to the high drama of the financial crisis in 2007/8, and ultimately to the anti-liberal surge of our own times. The present crisis of liberalism is leading us toward as yet unscripted decades. The era we have all been living through is closing out, and democracy is turning on its axis once again. "Brilliantly, Reid-Henry calls for the salvation of democracy from the choices of its own leaders if it is to survive" (Samuel Moyn, Yale University).

Taming the Wild Field Sep 05 2021 Stretching from the tributaries of the Danube to the Urals and from the Russian forests to the Black and Caspian seas, the vast European steppe has for centuries played very different roles in the Russian imagination. To the Grand Princes of Kiev and Muscovy, it was the "wild field," a region inhabited by nomadic Turko-Mongolic peoples who repeatedly threatened the fragile Slavic settlements to the north. For the emperors and empresses of imperial Russia, it was a land of boundless economic promise and a marker of national cultural prowess. By the mid-nineteenth century the steppe, once so alien and threatening, had emerged as an essential, if complicated, symbol of Russia itself. Traversing a thousand years of the region's history, Willard Sunderland recounts the complex process of Russian expansion and colonization, stressing the way outsider settlement at once created the steppe as a region of empire and was itself constantly changing. The story is populated by a colorful array of administrators, Cossack adventurers, Orthodox missionaries, geographers, foreign entrepreneurs, peasants, and (by the late nineteenth century) tourists and conservationists. Sunderland's approach to history is comparative throughout, and his comparisons of the steppe with the North American case are especially telling. *Taming the Wild Field* eloquently expresses concern with the fate of the world's great grasslands, and the book ends at the beginning of the twentieth century with the initiation of a conservation movement in Russia by those appalled at the high environmental cost of expansion.

Decadent Romanticism: 1780-1914 Feb 16 2020 For Decadent authors, Romanticism was a source of powerful imaginative revisionism, perversion, transition, and partial negation. But for all these strong Decadent reactions against the period, the cultural phenomenon of Decadence shared with Romanticism a mutual distrust of the philosophy of utilitarianism and the aesthetics of neo-Classicism. Reflecting on the interstices between Romantic and Decadent literature, *Decadent Romanticism* reassesses the diverse and creative reactions of Decadent authors to Romanticism between 1780 and 1914, while also remaining alert to the prescience of the Romantic imagination to envisage its own distorted, darker, perverted, other self. Creative pairings include William Blake and his Decadent critics, the recurring figure of the sphinx in the work of Thomas De Quincey and Decadent writers, and Percy Shelley with both Mathilde Blind and Swinburne. Not surprisingly, John Keats's works are a particular focus, in essays that explore Keats's literary and visual legacies and his resonance for writers who considered him an icon of art for art's sake. Crucial to this critical reassessment are the shared obsessions of Romanticism and Decadence with subjectivity, isolation, addiction, fragmentation, representation, romance, and voyeurism, as well as a poetics of desire and anxieties over the purpose of aestheticism.

Worlds Together, Worlds Apart: A History of the World: Beginnings Through the Fifteenth Century (Fourth Edition) (Vol. 1) Dec 16 2019 A truly global approach to world history built around significant world history stories. *Worlds Together, Worlds Apart* is organized around major world history stories and themes: the emergence of cities, the building of the Silk Road, the spread of major religions, the spread of the Black Death, the Age of Exploration, alternatives to nineteenth-century capitalism, the rise of modern nation-states and empires, and others. The Fourth Edition of this successful text has been streamlined, shortened, and features a new suite of tools designed to help students think critically, master content and make connections across time and place.

Imperial Meridian Oct 18 2022 In this impressive and ambitious survey Dr Bayly studies the rise, apogee and decline of what has come to be called 'the Second British Empire' -- the great expansion of British dominion overseas (particularly in Asia and the Middle East) during the French Revolutionary and Napoleonic era that, coming between the loss of America and the subsequent partition of Africa, constitutes the central

phase of British imperial history.

Mosquito Empires Jan 29 2021 This book explores the links among ecology, disease, and international politics in the context of the Greater Caribbean - the landscapes lying between Surinam and the Chesapeake - in the seventeenth through early twentieth centuries. Ecological changes made these landscapes especially suitable for the vector mosquitoes of yellow fever and malaria, and these diseases wrought systematic havoc among armies and would-be settlers. Because yellow fever confers immunity on survivors of the disease, and because malaria confers resistance, these diseases played partisan roles in the struggles for empire and revolution, attacking some populations more severely than others. In particular, yellow fever and malaria attacked newcomers to the region, which helped keep the Spanish Empire Spanish in the face of predatory rivals in the seventeenth and early eighteenth centuries. In the late eighteenth and through the nineteenth century, these diseases helped revolutions to succeed by decimating forces sent out from Europe to prevent them.

Forgotten Armies Feb 27 2021 In the early stages of the Second World War, the vast crescent of British-ruled territories stretching from India to Singapore appeared as a massive Allied asset. It provided scores of soldiers and great quantities of raw materials and helped present a seemingly impregnable global defense against the Axis. Yet, within a few weeks in 1941-42, a Japanese invasion had destroyed all this, sweeping suddenly and decisively through south and southeast Asia to the Indian frontier, and provoking the extraordinary revolutionary struggles which would mark the beginning of the end of British dominion in the East and the rise of today's Asian world. More than a military history, this gripping account of groundbreaking battles and guerrilla campaigns creates a panoramic view of British Asia as it was ravaged by warfare, nationalist insurgency, disease, and famine. It breathes life into the armies of soldiers, civilians, laborers, businessmen, comfort women, doctors, and nurses who confronted the daily brutalities of a combat zone which extended from metropolitan cities to remote jungles, from tropical plantations to the Himalayas. Drawing upon a vast range of Indian, Burmese, Chinese, and Malay as well as British, American, and Japanese voices, the authors make vivid one of the central dramas of the twentieth century: the birth of modern south and southeast Asia and the death of British rule.

Europe 1783-1914 May 21 2020 The third edition of Europe 1783-1914 provides a comprehensive overview of Europe from the outbreak of the French Revolution to the origins of the First World War. William Simpson and Martin Jones combine accounts of the most important countries, notably France, Germany and Russia, with the wider political, economic, social and cultural developments affecting Europe as a whole. These include: A survey of Europe c.1780: the social and economic background, forms of government, and the Enlightenment The impact of the French Revolution and Napoleon on Europe The spread of nationalism: the 1848 Revolutions and the unification of Italy and Germany Changes in the world of ideas: religious belief, romanticism, and cultural achievements in art, literature and music The age of imperialism: the expansion of Europe, Marxism and left-wing movements, international relations, 1870-1914 The reciprocal relationship between Europe and the United States Europe in 1914: shifts in the intellectual climate through the works of Darwin and Freud, scientific discoveries and the impact of new technologies, and changes in society and the position of women. Each chapter features a list of key dates, concise background information and suggestions for further reading, as well as a concluding 'Topics for Debate' section which contains relevant contemporary sources and outlines the contrasting views of recent historians on the key issues. The suggestions for further reading have been updated in every chapter by the addition of relevant and significant new books, published up to and including 2014. Extensively illustrated throughout with maps, contemporary cartoons and portraits, Europe 1783-1914 is a clear, detailed and highly accessible analysis of this turbulent and formative period of European history.

The Empire Project Apr 19 2020 The British Empire, wrote Adam Smith, 'has hitherto been not an empire, but the project of an empire' and John Darwin offers a magisterial global history of the rise and fall of that great imperial project. The British Empire, he argues, was much more than a group of colonies ruled over by a scattering of British expatriates until eventual independence. It was, above all, a global phenomenon. Its power derived rather less from the assertion of imperial authority than from the fusing together of three different kinds of empire: the settler empire of the 'white dominions'; the commercial empire of the City of London; and 'Greater India' which contributed markets, manpower and military muscle. This unprecedented history charts how this intricate imperial web was first strengthened, then weakened and finally severed on the rollercoaster of global economic, political and geostrategic upheaval on which it rode from beginning to end.

A Social History of France 1780-1914 Jun 14 2022 This volume provides a lively and authoritative synthesis of recent work on the social history of France and is now thoroughly updated to cover the 'long nineteenth century' from 1789-1914. Peter McPhee offers both a readable narrative and a distinctive, coherent argument about this remarkable century and explores key themes such as: - Peasant interaction with the environment - The changing experience of work and leisure - The nature of crime and protest - Changing demographic patterns and family structures - The religious practices of workers and peasants - The ideology and internal repercussions of colonisation. At the core of this social history is the exercise and experience of 'social relations of power' - not only because in these years there were four periods of protracted upheaval, but also because the history of the workplace, of relations between women and men, adults and children, is all about human interaction. Stimulating and enjoyable to read, this indispensable introduction to nineteenth-century France will help readers to make sense of the often bewildering story of these years, while giving them a better understanding of what it meant to be an inhabitant of France during that turbulent time.

The Modern World-System IV Jul 03 2021 Immanuel Wallerstein's highly influential, multi-volume opus, The Modern World-System, is one of this century's greatest works of social science. An innovative, panoramic reinterpretation of global history, it traces the emergence and development of the modern world from the sixteenth to the twentieth century. This new volume encompasses the nineteenth century from the revolutionary era of 1789 to the First World War. In this crucial period, three great ideologies—conservatism, liberalism, and radicalism—emerged in response to the worldwide cultural transformation that came about when the French Revolution legitimized the sovereignty of the people. Wallerstein tells how capitalists, and Great Britain, brought relative order to the world and how liberalism triumphed as the dominant ideology.

Empire of Cotton Nov 26 2020 WINNER OF THE BANCROFT PRIZE • A Pulitzer Prize finalist that's as unsettling as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist. "Masterly ... An astonishing achievement." —The New York Times The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, workers and factory owners. Sven Beckert makes clear how these forces ushered in the world of modern capitalism, including the vast wealth and disturbing inequalities that are with us today. In a remarkably brief period, European entrepreneurs and powerful politicians recast the world's most significant manufacturing industry, combining imperial expansion and slave labor with new machines and wage workers to make and remake global capitalism.

The Oxford World History of Empire Sep 17 2022 This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume I: The Imperial Experience is dedicated to synthesis and comparison. Following a comprehensive theoretical survey and bold world history synthesis, fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages. The broad range of perspectives includes: scale, world systems and geopolitics, military organization, political economy and elite formation, monumental display, law, mapping and registering, religion, literature, the politics of difference, resistance, energy transfers, ecology, memories, and the decline of empires. This broad set of topics is united by the central theme of power, examined under four headings: systems of power, cultures of power, disparities of power, and memory and decline. Taken together, these chapters offer a comprehensive and unique view of the imperial experience in world history.
