**Cattle Colonialism** Aug 02 2021 In the nineteenth century, the colonial territories of California and Hawai'i underwent important cultural, economic, and ecological transformations influenced by an unlikely factor: cows. The creation of native cattle cultures, represented by the Indian vaquero and the Hawaiian paniolo, demonstrates that California Indians and native Hawaiians adapted in ways that allowed them to harvest the opportunities for wealth that these unfamiliar biological resources presented. But the imposition of new property laws limited these indigenous responses, and Pacific cattle frontiers ultimately became the driving force behind Euro-American political and commercial domination, under which native residents lost land and sovereignty and faced demographic collapse. Environmental historians have too often overlooked California and Hawai'i, despite the roles the regions played in the colonial ranching frontiers of the Pacific World. In *Cattle Colonialism*, John Ryan Fischer significantly enlarges the scope of the American West by examining the trans-Pacific transformations these animals wrought on local landscapes and native economies.

**Assembling California** Dec 06 2021 At various times in a span of fifteen years, John McPhee made geological field surveys in the company of Eldridge Moores, a tectonicist at the University of California at Davis. The result of these trips is *Assembling California*, a cross-section in human and geologic time, from Donner Pass in the Sierra Nevada through the golden foothills of the Mother Lode and across the Great Central Valley to the wine country of the Coast Ranges, the rock of San Francisco, and the San Andreas family of faults. The two disparate time scales occasionally intersect—in the gold disruptions of the nineteenth century no less than in the earthquakes of the twentieth—and always with relevance to a newly understood geologic history in which half a dozen large and separate pieces of country are seen to have drifted in from far and near to coalesce as California. McPhee and Moores also journeyed to remote mountains of Arizona and to Cyprus and northern Greece, where rock of the deep-ocean floor has been transported into continental settings, as it has in California. Global in scope and a delight to read, *Assembling California* is a sweeping narrative of maps in motion, of evolving and dissolving lands.

*The John Steinbeck Collection* Jul 13 2022 This special 50-year jubilee edition of Steinbeck's classic novels features *The Grapes of Wrath*, *The Moon Is Down*, *Cannery Row*, *East of Eden*, and *Of Mice and Men*.

**Essential Muir** Sep 03 2021 "Like Muir himself, Essential Muir packs an astounding range of experience into a lithe frame: ecstatic yet scientific descriptions of Yosemite; the heartrending tale of that "wee, hairy, sleekit beastie," Stickeen; reflections on the society of Eskimos; Muir's touching tribute, after a lifetime of wonder, to the mighty baobab trees of Africa; and more. Fred D. White's selection from Muir's writings, and his illuminating commentary, reveal the coherence and drama of a remarkable life: new readers will understand why Muir has become an American icon, and readers who are familiar with his work will be delighted with this fresh look. Muir's fierce love of all of nature, from squirrels to glaciers (but perhaps not sheep), continues to inspire us nearly a century after his death."--Book jacket.

**Governors of California: John Downey** Dec 18 2022 The California Office of the Governor and the California State Library present a biographical sketch of California Governor John Downey (1827-1894). Downey served as governor from 1860 to 1862. The library includes his inaugural address and a timeline of events during his administration. The first lady was Maria Guirado. Downey vetoed the bulkhead bill, which would have allowed a monopoly of the San Francisco waterfront.

**Quicklet on John Muir's The Mountains of California (CliffNotes-like Summary)** Apr 10 2022 ABOUT THE BOOK While it is not uncommon to hear of an author's "seminal work," (take, for example *The Hero with a Thousand Faces* by Joseph Campbell), it is rare to find such a book that manages to seamlessly incorporate so many aspects not only of a topic, but also of the writer's life and, in the case of John Muir's *The Mountains of California*, the very essence of life itself. For indeed, some 120 years after its initial publication and just under a century after Muir's death, *Mountains* still brims with vitality, with vigor, and with an urgency that moves the reader as much today as it surely did those decades past. In fact, in light of the ever darkening storm clouds of climate change, the destruction of wild lands and resources, and our exponential population growth, the clarion call of *Mountains* may sound more sharply today than when it first went to press. MEET THE AUTHOR Steven John is a writer living and working in Los Angeles, by way of Washington DC, originally. His first novel will hit shelves on 3/27/12 and when not working on books, he fills his time with various professional writing work, hiking, mumbling at his pets and thinking up more interesting activities he can tell his wife he has been involved with. EXCERPT FROM THE BOOK Muir breaks his book down into logical chapters (we shall deal with many in due time and hint at others; some are long enough to warrant individual review, others can be dealt with in the flow of discussion) and manages to keep his enthusiasm almost in check, cleaving to each chapter's topic faithfully and only now and then allowing his prose to run off into an out-and-out song of praise and joy. At times one can perceive a slight contempt in his words when he discusses and alludes to those people who never venture far above sea level but as it is fair to assume his readers are rather kindred spirits, we forgive him immediately if we are not in fact slowly nodding, a wry smile on our lips. Buy a copy to keep reading!

**John Harris Forster** Dec 14 2019

**California** Jul 01 2021 A concise and lively history of California, the most multicultural state in the nation "A masterful history." —Kirkus Reviews (starred review) "Faragher takes the reader on a captivating journey through myriad twists and turns of California's multicultural history, enlivened by stories of people who rarely penetrate our traditional state chronicles."—Carlos E. Cortés, University of California, Riverside California is the most multicultural state in the nation. As John Mack Faragher argues in this concise and lively history, that is nothing new. California's natural variety has always supported diversity, including Native peoples speaking dozens of distinct languages, Spanish and Mexican colonists, gold seekers from all corners of the globe, and successive migrant waves from the eastern states, Europe, Latin America, Asia, and the Pacific Islands. Beautifully crafted and elegantly written, Faragher tells the stories of a colorful cast of characters, some famous, others mostly unknown, including African American Archy Lee, who sued for his freedom; Sinkyone Indian woman Sally Bell, who survived genocide; and Jewish schoolgirl Marilyn Greene, who spoke up for her Japanese friends after Pearl Harbor. California's multicultural diversity often led to conflict, turmoil, and violence, but also to invention, improvisation, and a struggle for multicultural democracy.

**John Chiara: California (Signed Edition)** Jan 19 2023 John Chiara creates his own cameras and chemical processes, in order to make unique photographs that use the direct exposure of light onto reversal film and paper. Each resulting photograph is a singular, luminous object. This highly anticipated first book includes the surreal and thrilling landscape and architectural images for which the artist has become known. John Chiara: California features images taken in the artist's hometown of San Francisco and other locations along the

Pacific Coast. An essay by Virginia Heckert situates Chiara's work in the landscape tradition of the American West and discusses this process-driven work.

John Galen Howard and the University of California Oct 16 2022 The competition was sponsored by Phoebe Apperson Hearst, whose generous funding of it made the University of California known throughout the United States and Europe as a major public institution of higher education. Woodbridge conveys the energy of the turn-of-the-century leaders of the university who, with John Galen Howard, established the campus architecture and setting as the embodiment of their commitment to create a public university of the highest quality."--BOOK JACKET.
