Woodward offers an intellectually rich look at the five great religions' foundational miracles and those of the later sages and saints. Leadership Behavior underscores the importance of the leader to an organization. Although the material presented in the book should be of value to those interested in leadership and organizational behavior in general, it should be of considerable value to those in the field. The material is more practical than theoretical, and covers multiple perspectives of leadership: women as leaders, group think and leadership, Japanese leadership, leadership and the appropriate use of power, power vs. authority, leadership and outsourcing, leadership and quality, the application of U.S. leadership techniques to Russian organizations, qualities of top

leadership, and leadership and employee empowerment. The book is meant to be of pragmatic and intellectual interest to anyone concerned with the challenging work of the leader. With tens of millions of hectares and hundreds of millions of lives in the balance, the debate over who should control South Asia's forests is of tremendous political significance. This book provides an insightful and thorough assessment of important forest management transitions currently underway. MARK POFFENBERGER, EXECUTIVE DIRECTOR OF COMMUNITY FORESTRY INTERNATIONAL The contributions in this volume not only breathe life into the field of writing and analysis related to forests, they do so on the strength of extraordinarily insightful research. Kudos to Springate-Baginski and Blaikie for providing us with a set of thoroughly researched, provocative studies that should be required reading not only for those interested in community forestry in south Asia, but in resource governance anywhere. ARUN AGRAWAL, ASSOCIATE PROFESSOR OF NATURAL RESOURCES & ENVIRONMENT, UNIVERSITY OF MICHIGAN, USA Makes a significant contribution to theory and practice of participatory forest management. YAM MALLA, EXECUTIVE DIRECTOR, REGIONAL COMMUNITY FORESTRY TRAINING CENTER FOR ASIA AND THE PACIFIC, BANGKOK This excellent and timely book provides thought-provoking insights to the issues of power and politics in forestry and the difficulties of transforming age-old structures that circumscribe the access of the poor to forests and their resources; it challenges our assumptions of the benefits of participatory forest management and the role of forestry in poverty reduction. It should be of interest to policymakers and to all those who have been involved with the struggle of transforming forestry over the decades. DR MARY HOBLEY, HOBLEY SHIELDS ASSOCIATES (NATURAL RESOURCE MANAGEMENT AND PLANNING CONSULTANCY) A rare combination of extensive field study, social science insights and policy studies will be of immense value DR N. C. SAXENA, MEMBER OF NATIONAL ADVISORY COUNCIL, GOVERNMENT OF INDIA In recent decades participatory approaches to forest management have been introduced around the world. This book assesses their implementation in the

highly politicized environments of India and Nepal. The authors critically examine the policy, implementation processes and causal factors affecting livelihood impacts. Considering narratives and field practice, with data from over 60 study villages and over 1000 household interviews, the book demonstrates why particular field outcomes have occurred and why policy reform often proves so difficult. Research findings on which the book is based are already influencing policy in India and Nepal, and the research and analysis have great relevance to forestry management in a wide range of countries. Published with DFID. Dreams can come true - it could happen to you... For the past two years, Evie Taylor has lived an invisible existence in London, a city she hoped would bring sparkle to her life. But all that is about to change. For winter has brought a flurry of snow and unexpected possibilities. Hidden away in the basement of Hardy's - once London's most elegant department store - Evie manages the stockroom of a shop whose glory days have long since passed. When Evie overhears that Hardy's is at risk of being sold, she secretly hatches a plan. If she can reverse the store's fortunes by December 26th- three weeks away - and transform it into a magical destination once again, she might just be able to save it. But she's going to need every ounce of talent and determination she has. In fact, she's going to need a miracle.

"The manager's job is to make human strength effective and human weakness irrelevant." —Peter F. Drucker "I am often asked by management students and middle managers, 'How can we make the changes you talk about if we are not at the top?' I reply, 'You can begin where you are, whatever your job. You can bring new insight, new leadership, to your team, your group.'"

—Frances Hesselbein "As they say, 'None of us is as smart as all of us.' That is good because the problems we face are too complex to be solved by any one person or any one discipline."

—Warren Bennis These are just a few of the insights collected in Leader to Leader, an inspiring examination of mission, leadership, values, innovation, building collaborations, shaping effective institutions, and creating community. Management pioneer Peter F. Drucker, Southwest Airlines CEO Herb Kelleher, best-selling authors Warren Bennis, Stephen R.

With an Updated Epilogue by the Author "A compelling portrait of seasoned homicide cops at work. This is L.A.'s darkest side: ironic, heart-breaking, stunningly violent, unfailingly human. Riveting." -Jonathan Kellerman The mandate for Los Angeles' unique police unit Homicide Special is to take on the toughest, most controversial, and highest-profile cases. In this "literate, unfailingly interesting work of true crime" (Kirkus Reviews), acclaimed writer Miles Corwin uses unprecedented access to narrate six of the unit's cases-and capture its newest generation at work. When a call girl from Kiev dies in the line of duty, detectives Chuck Knolls and Brian McCartin seek her killer among a circle of Russian women who have been sold into white slavery. When a gangster's daughter takes a bullet, veterans Jerry Stephens and Paul Coulter trace clues scattered across the country to a Manhattan real-estate magnate. A cold case is reopened; a mother-daughter drowning and a baffling rape/murder are solved. And, finally, Corwin re-creates the investigation surrounding the late Bonny Lee Blakley, allegedly murdered by her actor-husband, Robert Blake. With a revised epilogue updating each of these fascinating cases, Homicide Special offers a riveting, behind-the-scenes look at one of the preeminent units of homicide detectives in the country. Among the most enduring poetry of all time, William Shakespeare's 154 sonnets address such eternal themes as love, beauty, honesty, and the passage of time. Written primarily in four-line stanzas and iambic pentameter, Shakespeare's sonnets are now recognized as marking the beginning of modern love poetry. The sonnets have been translated into all major written

languages and are frequently used at romantic celebrations. Known as "The Bard of Avon," William Shakespeare is arguably the greatest English-language writer known. Enormously popular during his life, Shakespeare's works continue to resonate more than three centuries after his death, as has his influence on theatre and literature. Shakespeare's innovative use of character, language, and experimentation with romance as tragedy served as a foundation for later playwrights and dramatists, and some of his most famous lines of dialogue have become part of everyday speech. Schizophrenia is a chronic, severe, and disabling psychosis, which is an impairment of thinking in which the interpretation of reality is abnormal. Psychosis is a symptom of a disordered brain. Approximately One percent of the population worldwide develops schizophrenia during their lifetime. Although schizophrenia affects men and women with equal frequency, the disorder often appears earlier in men, usually in the late teens or early twenties, than in women, who are generally affected in the twenties to early thirties. People with schizophrenia often suffer symptoms such as hearing internal voices not heard by others, or believing that other people are reading their minds, controlling their thoughts, or plotting to harm them. The current evidence concerning the causes of schizophrenia are many. It is quite clear that multiple factors are involved. These include changes in the chemistry of the brain, changes in the structure of the brain, and genetic factors. Viral infections and head injuries may also play a role. New molecular tools and modern statistical analyses allow focusing in on particular genes that might make people more susceptible to schizophrenia by affecting, for example, brain development or neurotransmitter systems governing brain functioning. State-of-the-art imaging techniques are being used to study the living brain. They have recently revealed specific, subtle abnormalities in the structure and function of the brains of patients with schizophrenia. In other imaging studies, early

biochemical changes that may precede the onset of disease symptoms have been noted, prompting examination of the neural circuits that are most likely to be involved in producing those symptoms. This book presents new and important research in the field. 'Perhaps the best introduction yet to the roots of Thailand's present political impasse. A brilliant book.' Simon Long, *The Economist* Struggling to emerge from a despotic past, and convulsed by an intractable conflict that will determine its future, Thailand stands at a defining moment in its history. Scores have been killed on the streets of Bangkok. Freedom of speech is routinely denied. Democracy appears increasingly distant. And many Thais fear that the death of King Bhumibol Adulyadej is expected to unleash even greater instability. Yet in spite of the impact of the crisis, and the extraordinary importance of the royal succession, they have never been comprehensively analysed - until now. *Breaking Thailand's draconian lèse majesté law*, Andrew MacGregor Marshall is one of the only journalists covering contemporary Thailand to tell the whole story. Marshall provides a comprehensive explanation that for the first time makes sense of the crisis, revealing the unacknowledged succession conflict that has become entangled with the struggle for democracy in Thailand.

Transnational Marketing and Transnational Consumers are becoming increasingly common in today's globalizing and fast moving world of business. This book presents a fresh perspective focusing on the transnational character of organizations and firms while underlining the importance of the transnationality of marketing strategies for success. At the same time, it introduces the novel concepts of Transnational Consumers and Transnational Mobile Consumers which take into account the increasing human mobility and its implications for marketing success. This book gives flesh to the ever popular shorthand "glocal" referring to strategies thinking globally but acting locally. This is the reality of current business environment where the norm is fast mobility of goods, services, finance, and consumers. *Transnational Mobility of Consumers* is of increasing importance for understanding transnational marketing. Prof. Ibrahim Sirkeci's new book, *Transnational Marketing and Transnational Consumers*, deals

with this important issue in an excellent way. The book is highly recommendable for both academics and practitioners in International Marketing. Svend Hollensen University of Southern Denmark Author of 'Global Marketing' (Pearson)

'This book provides an excellent overview of more than a decade of transformation in a forest landscape where the interests of local people, extractive industries and globally important biodiversity are in conflict. The studies assembled here teach us that plans and strategies are fine but, in the real world of the forest frontier, conservation must be based upon negotiation, social learning and an ability to muddle through.'

Jeffrey Sayer, senior scientific adviser, Forest Conservation Programme IUCN - International Union for of Nature

The devolution of control over the world's forests from national or state and provincial level governments to local control is an ongoing global trend that deeply affects all aspects of forest management, conservation of biodiversity, control over resources, wealth distribution and livelihoods. This powerful new book from leading experts provides an in-depth account of how trends towards increased local governance are shifting control over natural resource management from the state to local societies, and the implications of this control for social justice and the environment. The book is based on ten years of work by a team of researchers in Malinau, Indonesian Borneo, one of the world's richest forest areas. The first part of the book sets the larger context of decentralization's impact on power struggles between the state and society. The authors then cover in detail how the devolution process has occurred in Malinau, the policy context, struggles and conflicts and how Malinau has organized itself. The third part of the book looks at the broader issues of property relations, conflict, local governance and political participation associated with decentralization in Malinau. Importantly, it draws out the salient points for other international contexts including the important determination that 'local political alliances', especially among ethnic minorities, are taking on greater prominence and creating new opportunities to influence forest policy in the world's richest forests from the ground up. This is top-level research for academics and professionals working on

forestry, natural resource management, policy and resource economics worldwide. Published with CIFOR The essential resource for players and fans of the game. Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process.

Like Shakespeare's Juliet, Annabella, accompanied by her down-to-earth nurse, is introduced to a series of suitors to her hand. Like Juliet, she finds all of them unsatisfactory - and rightly so, for the audience know that the nastiest of them is having an affair with her domineering aunt. Like Juliet, Annabella is wooed by a sensitive and passionate young man whose love she returns - but this young man happens to be her own brother, Giovanni. When they consummate their love and she, to avoid the scandal of extramarital pregnancy, agrees to marry her aunt's lover, the tragic outcome is inevitable. John Ford, writing his psychologically powerful and intellectually challenging

tragedies in the early years of King Charles I's reign, is a playwright of the first rank, as 20th-century directors have shown both in the theatre and on film.
