Bell, Professor Emeritus of Entomology at the University of Vermont, his colleagues and former students staged a Festschrift in his honor that included his wife and oft-times co-author, Joyce Bell. Two days of scientific presentations and a field day resulted in twenty-six manuscripts on such diverse organisms as Coleoptera, Collembola, and Diptera and in such disparate fields as taxonomy, phylogeny, ecology, with a sprinkling of natural history and cyberinfrastructure. Mostly, the theme of the papers focus on the beetle family Carabidae, on which the Bells spent a number of decades in pursuit of information on taxonomy and biology, particularly for the wrinkled bark beetles, the rhyssodines. Twenty-six scientific contributions make up this volume and they are introduced by the preface and first two papers on the Bells themselves and their other contributions to teaching and natural history studies in the environs of Burlington, Vermont. This book is designed to present, in one convenient source, comments published in periodicals about 325 automobile models manufactured since 1987 on a model-by-model basis. These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models. This title covers the history, nature, and sources of international criminal law; the *ratione personae*; *ratione materiae* - sources of substantive international criminal law; the indirect enforcement system; the direct enforcement system; and much more. This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century, and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions, with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras, and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations, and author and geographical indexes. This is a directory of companies that grant franchises with detailed information for each listed franchise.
